Attachment 17	User Notes

NOTE

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data used to produce this product (Disclosure Review Board (DRB) approval number: CBDRB-FY26-065

Questions about the **subject matter** should be directed to the staff in the Current Population Surveys Branch, Demographic Surveys Division, Bureau of the Census, Washington, D.C. 20233. Email: dsd.cps@census.gov. Phone: (301) 763-3806.

ATTACHMENT 1

ABSTRACT

Current Population Survey, February 2025: Art Benchmarking Survey Supplement [machine-readable data file] / conducted by the Bureau of the Census for the Bureau of Labor Statistics. -Washington: Bureau of the Census [producer and distributor, 2025 and for the National Endowment of the Arts.

Type of File:

Microdata; unit of observation is individuals within housing units.

Universe Description:

The universe consists of all persons in the civilian noninstitutional population of the United States living in households. The probability sample selected to represent the universe consists of approximately 70,000 households.

Subject-Matter Description:

Data are provided on labor force activity for the week prior to the survey. Comprehensive data are available on the employment status, occupation, and industry of persons 15 years old and over. Also shown are personal characteristics such as age, sex, race, marital status, veteran status, household relationship, educational background, and Hispanic origin.

The Arts Benchmark Survey questions were asked of interview numbers, 2, 3, 6, and 7 households. The respondent 18 years of age or older and his/her spouse as well as a second randomly selected person and his/her spouse/partner as applicable were asked the supplement questions. Questions asked include the following:

- Do any weaving, crocheting, quilting, needlepoint, knitting, or sewing.
- Play a musical instrument.
- Perform any acting, dancing, or singing.
- Go to an art exhibit, such as paintings, sculpture, pottery, graphic design, or photography.

Geographic Coverage:

States, regions, and divisions are identified in their entirety. Within confidentiality restrictions, indicators are provided for 260 selected core-based statistical areas (CBSA), 42 selected combined statistical areas (CSA), 277 counties, and 97 principal cities in multi-principal city core-based statistical areas or combined statistical areas. Also, within confidentiality restrictions, indicators are provided for metropolitan/non-metropolitan, central city/balance metropolitan, and CBSA size.

Technical Description:

File Structure: Rectangular.
File Size: 125,028 logical records; 1,126 character logical record length.

File Sort Sequence: State rank by CBSA rank by household identification number by line number.

Reference Materials:

Current Population Survey, February 2025: Annual Arts Benchmarking Supplement Technical Documentation. Documentation contains this abstract, questionnaire facsimiles, and record layouts of the file. Additional copies are available from Marketing Services Office, Customer Services Center, U.S. Census Bureau, Washington, DC 20233.

U.S. Census Bureau. *The Current Population Survey Design and Methodology* (Technical Paper 77) describes in detail the sample design and survey procedures used as well as the accuracy of estimates and sampling errors. Reference copies should be available from most public libraries or Federal Depository Libraries.

For information about the Current Population Survey and other Census Bureau data products, be sure to browse by topic or by survey/program on the Census Bureau's home page (www.census.gov/) where you can search our knowledge base and submit questions.

OVERVIEW

Current Population Survey

Introduction

The Current Population Survey (CPS) is the source of the official government statistics on employment and unemployment. The CPS has been conducted monthly for over 60 years. Currently, we obtain interviews from about 70,000 households monthly, scientifically selected on the basis of area of residence to represent the nation as a whole, individual states, and other specified areas. Each household is interviewed once a month for four consecutive months one year, and again for the corresponding time period a year later. This technique enables us to obtain reliable month-to-month and year-to-year comparisons at a reasonable cost while minimizing the inconvenience to any one household.

Although the main purpose of the survey is to collect information on the employment situation, a very important secondary purpose is to collect information on demographic characteristics such as age, sex, race, marital status, educational attainment, family relationship, occupation, and industry. From time to time, additional questions are included on health, education, income, and previous work experience. The statistics resulting from these questions serve to update similar information collected once every 10 years through the decennial census, and are used by government policymakers and legislators as important indicators of our nation's economic situation and for planning and evaluating many government programs.

The CPS provides current estimates of the economic status and activities of the population of the United States. Because it is not possible to develop one or two overall figures (such as the number of unemployed) that would adequately describe the whole complex of labor market phenomena, the CPS is designed to provide a large amount of detailed and supplementary data. Such data are made available to meet a wide variety of needs on the part of users of labor market information.

Thus, the CPS is the only source of monthly estimates of total employment (both farm and nonfarm); nonfarm self-employed persons, domestics, and unpaid helpers in nonfarm family enterprises; wage and salaried employees; and, finally, estimates of total unemployment.

It provides the only available distribution of workers by the number of hours worked (as distinguished from aggregate or average hours for an industry), permitting separate analyses of part-time workers, workers on overtime, etc. The survey is also the only comprehensive current source of information on the occupation of workers and the industries in which they work. Information is available from the survey not only for persons currently in the labor force but also for those who are outside the labor force. The characteristics of such persons - whether married women with or without young children, disabled persons, students, older retired workers, etc., can be determined. Information on their current desire for work, their past work experience, and their intentions as to job seeking are also available.

For a more detailed discussion about the basic labor force data gathered on a monthly basis in the CPS survey, see "Explanatory Notes and Estimates of Error" in any recent issue of the *Employment and Earnings*, a Bureau of Labor Statistics periodical. This source is referred to on the next page.

CPS Sample Design

The Current Population Survey (CPS) is a monthly survey designed primarily to produce national and state estimates of labor force characteristics of the civilian noninstitutional population (CNP) 16 years of age and older. It is conducted in approximately 60,000 eligible housing units throughout the United States. (Note: 'Eligible'can be simplistically defined as an occupied housing unit having at least one person in the CNP.) This sample includes 10,000 eligible housing units from the monthly supplementary sample to improve state-level estimates of health insurance coverage for low-income children, also known as the CHIP expansion. This supplementary sample has been part of the official CPS since July 2001. Thirty-two states plus the District of Columbia contain this supplementary sample each month.

The CPS sample is based on information from the 2010 Decennial Census, in accordance with usual practice. Historically, the CPS sample has been redesigned after each Decennial Census.

The CPS sample is a probability sample based on a stratified two-stage sampling scheme: selection of sample primary sampling units (PSUs) and selection of sample housing units within those PSUs. In general, the CPS sample is selected from lists of addresses obtained from the Master Address File (MAF) with updates from the United States Postal Service (USPS) twice a year. The MAF is the Census Bureau's permanent list of addresses, including their geographic locations, for individual living quarters. It is continuously maintained through partnerships with the USPS; with Federal, State, regional, and local agencies; and with the private sector, and it is used as a sample frame by many Census Bureau demographic surveys.

Approximately 70,000 housing units are assigned for interview each month, of which about 60,000 are occupied and thus eligible for interview. The remainder are units found to be destroyed, vacant, converted to nonresidential use, containing persons whose usual place of residence is elsewhere, or ineligible for other reasons. Of the 60,000 occupied housing units, approximately 25 percent are not interviewed in a given month due to temporary absence (vacation, etc.), the residents are not found at home after repeated attempts, inability of persons contacted to respond, unavailability for other reasons, and refusals to cooperate. The interviewed households contain approximately 80,000 persons 15 years old and over, approximately 16,000 children 0-14 years old, and about 300 Armed Forces members living with civilians either on or off base within these households. A more precise explanation regarding the CPS sample design is provided in *Current Population Survey, design and methodology (Technical paper 77)* on the Census Bureau's documentation webpage.

Relationship of Current Population Survey Files to Publications

Each month, a significant amount of information about the labor force is published by the Bureau of Labor Statistics in the *Employment and Earnings* and *Monthly Labor Review* reports.

As mentioned previously, the CPS also serves as a vehicle for supplemental inquiries on subjects other than employment, which are periodically added to the questionnaire. From the basic and supplemental data, the Bureau of the Census issues three series of publications under the general title Current Population Reports:

P-20 Population Characteristics
P-23 Special Studies
P-60 Consumer Income

All Current Population Reports, including the other series for population estimates and projections and special censuses, may be obtained by subscription from the U.S. Government Printing Office at 202-783-3238. Subscriptions are available as follows: Population Characteristics, Special Studies, and Consumer Income series (P-20, P-23, P-60) combined, $101 per year (sold as a package only); Population Estimates and Projections, (P-25),

$27 per year. Single issues may be ordered separately; ordering information and prices are provided in the Bureau of the *Census Catalog and Guide*, the *Monthly Product Announcement* (MPA), and in *Census and You*. Selected reports also may be accessed on the INTERNET at http://census.gov/library/publications.html.

Geographic Limitations

The CPS sample was selected so that specific reliability criteria were met nationally, for each of the 50 States and for the District of Columbia. Since 1985, these reliability criteria have been maintained through periodic additions and deletions in the State samples. Estimates formed for geographic areas identified on the microdata file which are smaller than states are not as reliable.

Weights

Under the estimating methods used in the CPS, all of the results for a given month become available simultaneously and are based on returns for the entire panel of respondents. The CPS estimation procedure involves weighting the data from each sample person. The base weight, which is the inverse of the probability of the person being in the sample, is a rough measure of the number of actual persons that the sample person represents. Almost all sample persons in the same state have the same base weight, but the weights across states are different. Selection probabilities may also differ for some sample areas due to field subsampling, which is done when areas selected for the sample contain many more households than expected. The base weights are then adjusted for noninterview, and the ratio estimation procedure is applied.

1. **Noninterview adjustment**. The weights for all interviewed households are adjusted to the extent needed to account for occupied sample households for which no information was obtained because of absence, impassable roads, refusals, or unavailability of the respondent for other reasons. This noninterview adjustment is made separately for clusters of similar sample areas that are usually, but not necessarily, contained within a state. Similarity of sample areas is based on Core-Based Statistical Area (CBSA) status and size. Within each cluster, there is a further breakdown by residence. Each CBSA cluster is split by "principal city" and "balance of the CBSA." The proportion of occupied sample households not interviewed fluctuates around 8 percent depending on weather, vacations, etc.

2. **Ratio estimates**. The distribution of the population selected for the sample may differ somewhat, by chance, from that of the population as a whole in such characteristics as age, race, sex, and state of residence. Because these characteristics are closely correlated with labor force participation and other principal measurements made from the sample, the survey estimates can be substantially improved when weighted appropriately by the known distribution of these population characteristics. This is accomplished through two stages of ratio adjustment as follows:

    a. *First-stage ratio estimate*. The purpose of the first-stage ratio adjustment is to reduce the contribution to variance that results from selecting a sample of PSUs rather than drawing sample households from every PSU in the nation. This adjustment is made to the CPS weights in two race cells: black and nonblack; it is applied only to PSUs that are nonself-representing and for those states that have a substantial number of black households. The procedure corrects for differences that existed in each state cell at the time of the 2000 census between 1) the race distribution of the population in sample PSUs and 2) the race distribution of all PSUs (both 1 and 2 exclude self-representing PSUs).

    b. *Second-stage ratio estimate*. This procedure substantially reduces the variability of estimates and corrects, to some extent, for CPS undercoverage. The CPS sample weights are adjusted to ensure that sample-based estimates of population match independent population controls. Three sets of controls are used:

1) 51 state controls of the civilian noninstitutional population 16 years of age and older

2) national civilian noninstitutional population controls for 14 hispanic and 5 nonhispanic age-sex categories

3) national civilian noninstitutional population controls for 66 white, 42 black, and 10 "other" age-sex categories

The independent population controls are prepared by projecting forward the resident population as enumerated on April 1, 2000. The projections are derived by updating demographic census data with information from a variety of other data sources that account for births, deaths, and net migration. Estimated numbers of resident Armed Forces personnel and institutionalized persons reduce the resident population to the civilian noninstitutional population. Estimates of net census undercount, determined from the Post Enumeration Survey, are added to the population projections. Prior to January 2003, the projections were based on earlier censuses, and prior to January 1994, there was no correction for census undercount. A summary of the current procedures used to make population projections is given in “Revisions in the Current Population Survey Effective January 2003" in the January 2003 issue of Employment and Earnings.

Comparability of CPS from Microdata Files with Published Sources

Although total estimates of the total population will equal published estimates, labor force estimates produced from a microdata file may not be directly comparable or identical with the published nonseasonally adjusted labor force data. The official labor force statistics published by the Bureau of Labor Statistics (BLS) are calculated using the CPS composite weight (PWCMPWGT). Anyone wanting to replicate not seasonally adjusted BLS estimates should use this weight. However, not all estimates made from a public use file will match such weighted published estimates. This is because of various steps taken in the creation of CPS public use files to protect the confidentiality of CPS respondents. Top side estimates for most major demographic and economic categories such as age, race, gender and major labor force status will agree with the published totals; however, estimates for small groups/combinations of these characteristics will differ. The same is true for any estimates for any demographic or labor force characteristic not listed above. Such estimates will be similar but not identical.

Another factor also inhibits microdata comparison with published labor force data. This is the seasonal adjustment that is applied to many published statistics. This adjustment is used to adjust for normal seasonal variations to help distinguish the underlying economic situation in month-to-month changes and is not reflected in any of the weights or variables included on the public use files.

Shown below are data from January and July 2015 which demonstrate how estimates compiled using the final weights from the microdata file may differ from the published composited estimates, with and without seasonal adjustment. Note that the composite estimation procedure was not used for estimates published from January 1994 to May 1994. For a further description of both the composite estimator and seasonal adjustment, see the most recent of the CPS Technical Paper (66 or 77).

Comparison of CPS Estimates from Microdata Files with Published Sources

	Civilian Noninstitutional Population	Civilian Labor Force	Employed	Unemployed	Not in Labor Force
January 2015 Data (000's)					
Final Weights	249,723	156,311	146,658	9,653	93,412
Composited (Not Seasonally Adjusted)	249,723	156,050	146,552	9,498	93,674
Composited (Seasonally Adjusted)	249,723	157,180	148,201	8,979	92,544
July 1993 Data (000's)					
Final Weights	250,876	159,112	150,176	8,936	91,764
Composited (Not Seasonally Adjusted)	250,876	158,527	149,722	8,805	92,349
Composited (Seasonally Adjusted)	250,876	157,106	148,840	8,266	93,770

February 2025 Arts Benchmarking Survey Supplement

I. General

Census Bureau staff conducted the February 2025 Arts Benchmarking Survey as a supplement to that month's Current Population Survey (CPS). The CPS is a monthly labor force survey in which interviews are conducted in approximately 60,000 households across the Nation. Attachment 8 contains the February 2025 Arts Benchmarking Survey supplement questions asked of all applicable persons 18 years old or older.

Attachment 2 comprises a description of the CPS entitled "Overview--Current Population Survey."

A description of the February 2025 Arts Benchmarking Survey follows.

II. Data Collection

The February 2025 Arts Benchmarking Survey questions were asked of the CPS respondent and spouse as well as another randomly selected household member aged 18 or older and his/her spouse. About half of the sampled households were asked the supplement questions. Interview numbers 2, 3, 6, and 7 were asked the supplement questions. If the selected person had a spouse or partner, then questions were also asked of the spouse/partner. The supplement contained questions about the sampled member's participation in various artistic activities from February 2024 through February 2025. Questions were asked about the use of pottery, ceramics, jewelry, leatherwork, metalwork and woodwork. They were also asked about weaving, crocheting, needlepointing, knitting, sewing, and whether they played a musical instrument. Questions also included doing any acting, singing or dancing.

Interviews were conducted during the period of February 16-26, 2025.

III. Data Processing

The data processing involved editing the February 2025 Arts Benchmarking Survey supplement data.

A. Supplement Computer Edits.

The data processing involved a skip pattern edit of all Arts Benchmarking Survey items. In addition, age was verified. The values for each variable are defined in the supplement record layout (Attachment 7).

B. Weighting.

The design of the supplement questionnaire required the final supplement weight (PWABSWGT) to be created. This weight should be used to estimate the supplement variables.

IV. February 2025 CPS Arts Benchmarking Survey Supplement Computer File

A. CPS Labor Force Data.

The February 2025 file contains 125,028 records. Each record contains 1,126 characters. Attachment 7 contains the variable name, character size, location on record, universe, and the values of the variables.

The variable PRPERTYP (located in positions 161-162 on the CPS Basic Items Record Layout) determines the type of person as follows:

PRPERTYP

1 = Child household member (0-14 years old)

2 = Adult civilian household member (15+ years old)

3 = Adult Armed Forces household member (15+ years old)

The variable HRINTSTA (located in positions 57-58 on the CPS Basic Items Record Layout) determines the interview status of the household.

HRINTSTA

1 = Interview

2 = Type A Noninterview (These records represent households that were eligible for the February 2025 CPS interview, but were not interviewed because no one was home, household members were temporarily absent, etc.)

3 = Type B Noninterview (These records represent sample addresses determined to be temporarily ineligible for the CPS by virtue of being vacant, nonresidential, etc. These households could become eligible for a CPS interview.)

4 = Type C Noninterview (These records represent sample addresses determined to be ineligible for CPS by virtue of a permanent change such as demolished, condemned, etc. These addresses will not be visited again for CPS interviews.)

By combining the values of PRPERTYP (1-3) and HRINTSTA (2-4), the number of records can be determined.

The values of PRPERTYP are:

	Unweighted Counts
1 = (Child)	16,048
2 = (Adult Civilian, 15+)	80,456
3 = (Adult, Armed Forces)	301

The values of HRINTSTA are:

1 = Interview	96,805
2 = Type A Noninterview	18,779
3 = Type B Noninterview	8,897
4 = Type C Noninterview	547

B. February 2025 Arts Benchmarking Survey supplement Data

The February 2025 Arts Benchmarking Survey supplement data are located in character positions 1001-1126 (See Attachment 7).

C. Tallying the February Arts Benchmarking Survey Supplement File

The February 2025 supplement universe represented the full CPS sample comprised of all households and people including those that are not occupied or eligible for the supplement. Subset any tallies to the proper universe.

D. Unweighted Counts

Attachment 13 is a tally listing of unweighted counts. Use these counts to ensure the file is accessed properly.

E. Data Contacts

For questions concerning the collection of this data, please contact the staff in the Current Population Survey Branch at the Census Bureau at: dsd.cps@census.gov .

ATTACHMENT 4

GLOSSARY

Current Population Survey

Age–Age classification is based on the age of the person at his/her last birthday. The adult universe (i.e., population of marriageable age) is comprised of persons 15 years and over for CPS labor force data.

Allocation Flag–Each edited item has a corresponding allocation flag indicating the nature of the edit. See the attachment on allocation flags for more information. The second character of the item name is always "X".

Armed Forces–Demographic information for Armed Forces members (enumerated in off-base housing or on-base with their families) is included on the CPS data files. No labor force information is collected of Armed Forces members in any month. In March, supplemental data on income are included for Armed Forces members. This is the only month that non-demographic information is included for Armed Forces members.

Civilian Labor Force–(See Labor Force.)

Class of Worker–This refers to the broad classification of the person's employer. These broad classifications for current jobs are:

1) Federal government
2) State government
3) Local government
4) Private industry (including self-employed, incorporated)
5) Self-employed (not incorporated)
6) Working without pay

Domain–The domain for an item is a list or range of its possible values. Note that all unedited items have possible values of -1 (blank), -2 (don't know), and -3 (refused). Since all items have these possible values, they are not shown as valid entries for each item.

Duration of Unemployment–Duration of unemployment represents the length of time (through the current survey week) during which persons classified as unemployed are continuously looking for work. For persons on layoff, duration of unemployment represents the number of full weeks since the termination of their most recent employment. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the present period of seeking work.

Earners, Number of–The file includes all persons 15 years old and over in the household with $1 or more in wages and salaries, or $1 or more of a loss in net income from farm or nonfarm self-employment during the preceding year.

Edited item–An edited item is allocated or imputed by the processing system. In most cases this means allocating a value where the unedited item contains a value of blank, "don't know", or "refused". The second character of the item name is always "E".

An edited version of an item exists only if that item is processed through the edits. If the edits never deal with a particular item, then that item only has an unedited version.

Since the instrument enforces skip patterns and consistency between many items, the edits are left mainly with the job of allocating missing values. Also, since an interviewer is allowed to "back up" in the interview, there may be "off-path" items filled in the unedited data. The edits also blank these off-path items if an edited version of the items exists.

Education—(See Level of School Completed.)

Employed—(See Labor Force.)

Family—A family is a group of two persons or more (one of whom is the householder) residing together and related by birth, marriage, or adoption. All such persons (including related subfamily members) are considered as members of one family. Beginning with the 1980 CPS, unrelated subfamilies (referred to in the past as secondary families) are no longer included in the count of families, nor are the members of unrelated subfamilies included in the count of family members.

Family Household—A family household is a household maintained by a family (as defined above), and may include among the household members any unrelated persons (unrelated subfamily members and/or secondary individuals) who may be residing there. The number of family households is equal to the number of families. The count of family household members differs from the count of family members, however, in that the family household members include all persons living in the household, whereas family members include only the householder and his/her relatives. (See the definition of Family).

Family Weight—This weight is used only for tallying family characteristics. In March, the weight on the family record is the March supplement weight of the householder or reference person.

Final Weight—Used in tabulating labor force items in all months, including March. The final weight is controlled to independent estimates for:

1) States
2) Origin, Sex, and Age
3) Age, Race, and Sex

This weight should not be used when tabulating March supplement data.

Full-Time Worker—Persons on full-time schedules include persons working 35 hours or more, persons who worked 1-34 hours for noneconomic reasons (e.g., illness) and usually work full-time, and persons "with a job but not at work" who usually work full-time.

Group Quarters—Group quarters are noninstitutional living arrangements for groups not living in conventional housing units or groups living in housing units containing nine or more persons unrelated to the person in charge.

Head Versus Householder—Beginning with the March 1980 CPS, the Bureau of the Census discontinued the use of the terms "head of household" and "head of family." Instead, the terms "householder" and "family householder" are used.

Highest Grade of School Attended—(See Level of School Completed.)

Hispanic/Non-Hispanic Origin—A person's Hispanic/Non-Hispanic status in this file is determined on the basis of a question that simply asks "(Is/Are) (Name/you) Hispanic?"

Hours of Work—Hours of work statistics relate to the actual number of hours worked during the survey week. For example, a person who normally works 40 hours a week but who is off on the Veterans Day holiday is reported as working 32 hours even though he is paid for the holiday.

For persons working in more than one job, the figures related to the number of hours worked in all jobs during the week. However, all the hours are credited to the major job.

Household—A household consists of all the persons who occupy a house, an apartment, or other group of rooms, or a room, which constitutes a housing unit. A group of rooms or a single room is regarded as a housing unit when it is occupied as separate living quarters; that is, when the occupants do not live with any other person in the structure, and when there is direct access from the outside or through a common hall. The count of households excludes persons living in group quarters, such as military barracks and institutions. Inmates of institutions (mental hospitals, rest homes, correctional institutions, etc.) are not included in the survey.

Household Weight—The household weight is used for tallying household characteristics. In March, the household weight is the March Supplement weight of the householder.

Householder—The householder refers to the person (or one of the persons) in whose name the housing unit is owned or rented (maintained) or, if there is no such person, any adult member, excluding roomers, boarders, or paid employees. If the house is owned or rented jointly by a married couple, the householder may be either the husband or the wife. The person designated as the householder is the "reference person" to whom the relationship of all other household members, if any, is recorded.

Householder With No Other Relatives in Household —A householder who has no relatives living in the household. This is the entry for a person living alone. Another example is the designated householder of an apartment shared by two or more unrelated individuals.

Householder With Other Relatives (Including Spouse) in Household The person designated as householder if he/she has one or more relatives (including spouse) living in the household.

Industry, Occupation, and Class of Worker (I&O) - Current Job (basic data) For the employed, current job is the job held in the reference week (the week before the survey). Persons with two or more jobs are classified in the job at which they worked the most hours during the reference week. The unemployed are classified according to their latest full-time job lasting two or more weeks or by the job (either full-time or part-time). The I & O questions are also asked of persons not in the labor force who are in the fourth and eighth months in sample and who have worked in the last five years.

Job Seekers—All unemployed persons who made specific efforts to find a job sometime during the 4-week period preceding the survey week.

Longitudinal Weight—Used for gross flows analysis. Only found on adult records matched from month to month.

PEMLR (Major Labor Force Recode) - This classification is available for each civilian 15 years old and over according to his/her responses to the monthly (basic) labor force items.

Labor Force—Persons are classified as in the labor force if they are employed, unemployed, or in the Armed Forces during the survey week. The "civilian labor force" includes all civilians classified as employed or unemployed. The file includes labor force data for civilians age 15 and over. However, the official definition of the civilian labor force is age 16 and over.

1. *Employed*

   Employed persons comprise (1) all civilians who, during the survey week, do any work at all as paid employees or in their own business or profession, or on their own farm, or who work 15 hours or more as unpaid workers on a farm in a business operated by a member of the family; and (2) all those who have jobs but who are not working because of illness, bad weather, vacation, or labor-management dispute, or because they are taking time off for personal reasons, whether or not they are seeking other jobs. These persons would have a Monthly Labor Force Recode (MLR) of 1 or 2 respectively in characters 180-181 of the person record which designates "at work" and "with a job, but not at work." Each employed person is counted only once. Those persons who held more than one job are counted in the job at which they worked the greatest number of hours during the survey week. If they worked an equal number of hours at more than one job, they are counted at the job they held the longest.

2. *Unemployed*

   Unemployed persons are those civilians who, during the survey week, have no employment but are available for work, and (1) have engaged in any specific job seeking activity within the past 4 weeks such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (2) are waiting to be called back to a job from which they had been laid off; or (3) are waiting to report to a new wage or salary job within 30 days. These persons would have an MLR code of 3 or 4 in characters 180-181 of the person record. The unemployed includes job leavers, job losers, new job entrants, and job reentrants.

   a. *Job Leavers*

      Persons who quit or otherwise terminate their employment voluntarily and immediately begin looking for work.

   b. *Job Losers*

      Persons whose employment ends involuntarily, who immediately begin looking for work, and those persons who are already on layoff.

   c. *New Job Entrants*

      Persons who never worked at a full-time job lasting two weeks or longer.

   d. *Job Reentrants*

      Persons who previously worked at a full-time job lasting two weeks or longer but are out of the labor force prior to beginning to look for work.

Finally, it should be noted that the unemployment rate represents the number of persons unemployed as a percent of the civilian labor force 16 years old and over. This measure can also be computed for groups within the labor force classified by sex, age, marital status, race, etc. The job loser, job leaver, reentrant, and new entrant rates are each calculated as a percent of the civilian labor force 16 years old and over; the sum of the rates for the four groups thus equals the total unemployment rate.

3. Not in Labor Force

All civilians 15 years old and over who are not classified as employed or unemployed. These persons are further classified by major activity: retired, unable to work because of long-term physical or mental illness, and other. The "other" group includes, for the most part, students and persons keeping house. Persons who report doing unpaid work in a family farm or business for less than 15 hours are also classified as not in the labor force.

For persons not in the labor force, data on previous work experience, intentions to seek work again, desire for a job at the time of interview, and reasons for not looking for work are asked only in those households that are in the fourth and eighth months of the sample, i.e., the "outgoing" groups, those which had been in the sample for three previous months and would not be in for the subsequent month.

Persons classified as NILF have an MLR code of 5-7 in characters 180-181 of the person record.

Layoff—A person who is unemployed but expects to be called back to a specific job. If he/she expects to be called back within 30 days, it is considered a temporary layoff; otherwise, it is an indefinite layoff.

Level of School Completed/Degree Received —These data changed beginning with the January 1992 file. A new question, "What is the highest level of school ... has completed or the highest degree ... has received?" replaced the old "Highest grade attended" and "Year completed" questions. The new question provides more accurate data on the degree status of college students. Educational attainment applies only to progress in "regular" school. Such schools include graded public, private, and parochial elementary and high schools (both junior and senior high), colleges, universities, and professional schools, whether day schools or night schools. Thus, regular schooling is that which may advance a person toward an elementary school certificate or high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system.

Looking for Work—A person who is trying to get work or trying to establish a business or profession.

Marital Status—The marital status classification identifies four major categories: single (never married), married, widowed, and divorced. These terms refer to the marital status at the time of enumeration.

The category "married" is further divided into "married, civilian spouse present," "married, Armed Force spouse present," "married, spouse absent," "married, Armed Force spouse absent," and "separated." A person is classified as "married, spouse present" if the husband or wife is reported as a member of the household even though he or she may be temporarily absent on business or on vacation, visiting, in a hospital, etc., at the time of the enumeration. Persons reported as "separated" included those with legal separations, those living apart with intentions of obtaining a divorce, and other persons permanently or temporarily estranged from their spouses because of marital discord.

For the purpose of this file, the group "other marital status" includes "widowed and divorced," "separated," and "other married, spouse absent."

Month-In-Sample—The term is defined as the number of times a unit is interviewed. Each unit is interviewed eight times during the life of the sample.

Never Worked—A person who has never held a full-time civilian job lasting two consecutive weeks or more.

Nonfamily Householder—A nonfamily householder (formerly called a primary individual) is a person maintaining a household while living alone or with nonrelatives only.

Nonworker—A person who does not do any work in the calendar year preceding the survey.

Nonrelative of Householder With No Own Relatives in Household—A nonrelative of the householder who has no relative(s) of his own in the household. This category includes such nonrelatives as a foster child, a ward, a lodger, a servant, or a hired hand, who has no relatives of his own living with him in the household.

Nonrelative of Householder With Own Relatives (Including Spouse) in Household—Any household member who is not related to the householder but has relatives of his own in the household; for example, a lodger, his spouse, and their son.

Other Relative of Householder—Any relative of the householder other than his spouse or child; for example, father, mother, grandson, daughter-in-law, etc.

Out Variable—An instrument-created item that stores the results of another item.

Own Child—A child related by birth, marriage, or adoption to the family householder.

Part-Time, Economic Reasons—The item includes slack work, material shortages, repairs to plant or equipment, start or termination of job during the week, and inability to find full-time work. (See also Full-Time Worker.)

Part-Time, Other Reasons—The item includes labor dispute, bad weather, own illness, vacation, demands of home housework, school, no desire for full-time work, and full-time worker only during peak season.

Part-Time Work—Persons who work between 1 and 34 hours are designated as working "part-time" in the current job held during the reference week. For the March supplement, a person is classified as having worked part-time during the preceding calendar year if he worked less than 35 hours per week in a majority of the weeks in which he worked during the year. Conversely, he is classified as having worked full-time if he worked 35 hours or more per week during a majority of the weeks in which he worked.

Part-Year Work—Part-year work is classified as less than 50 weeks' work.

Population Coverage—Population coverage includes the civilian population of the United States plus approximately one million members of the Armed Forces in the United States living off post or with their families on post but excludes all other members of the Armed Forces. This file excludes inmates of institutions. The labor force and work experience data are not collected for Armed Forces members.

Processing Recode—An item calculated by the processing system from a combination of other items in the database. The second character of the item name is always "R".

Race—The population is divided into six groups on the basis of race: White, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian or Other Pacific Islander, and Other races. The 2011 CPS uses the Census 2010 question on race that allows for more than one race reporting, but does not include the Census 2010 "Some Other Race" category.

Reentrants—Persons who previously worked at a full-time job lasting two weeks or longer, but who are out of the labor force prior to beginning to look for work.

Related Children–Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption. For each type of family unit identified in the CPS, the count of own children under 18 years old is limited to single (never married) children; however, "own children under 25" and "own children of any age," include all children regardless of marital status. The totals include never-married children living away from home in college dormitories.

Related Subfamily–A related subfamily is a married couple with or without children, or one parent with one or more own single (never married) children under 18 years old, living in a household and related to, but not including, the householder or spouse. The most common example of a related subfamily is a young married couple sharing the home of the husband's or wife's parents. The number of related subfamilies is not included in the number of families.

School, Major Activity–A person who spent most of his time during the survey week attending any kind of public or private school, including trade or vocational schools in which students receive no compensation in money or kind.

Secondary Individual–A secondary individual is a person in a household or group quarters such as a guest, roomer, boarder, or resident employee (excluding nonfamily households and inmates of institutions) who is not related to any other person in the household or group quarters.

Self-Employed–Self-employed persons are those who work for profit or fees in their own business, profession or trade, or operate a farm.

Stretches of Unemployment–A continuous stretch is one that is not interrupted by the person getting a job or leaving the labor market to go to school, to keep house, etc. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the period of seeking work.

Unable to Work–A person is classified as unable to work because of long-term physical or mental illness, lasting six months or longer.

Unedited item–An item that is produced by the computer automated instrument, either collected during the interview or created by the instrument. The second character of the item name is always "U".

Unemployed–(See Labor Force.)

Unpaid Family Workers–Unpaid family workers are persons working without pay for 15 hours a week or more on a farm or in a business operated by a member of the household to whom they are related by birth or marriage.

Unrelated Individuals–Unrelated individuals are persons of any age (other than inmates of institutions) who are not living with any relatives. An unrelated individual may be (1) a nonfamily householder living alone or with nonrelatives only, (2) a roomer, boarder, or resident employee with no relatives in the household, or (3) a group quarters member who has no relatives living with him/her. Thus, a widow who occupies her house alone or with one or more other persons not related to her, a roomer not related to anyone else in the housing unit, a maid living as a member of her employer's household but with no relatives in the household, and a resident staff member in a hospital living apart from any relatives are all examples of unrelated individuals.

Unrelated Subfamily–An unrelated subfamily is a family that does not include among its members the householder and relatives of the householder. Members of unrelated subfamilies may include persons such as guests, roomers, boarders, or resident employees and their relatives living in a household. The number of unrelated subfamily members is included in the number of household members but is not included in the count of family members.

Persons living with relatives in group quarters were formerly considered as members of families. However, the number of such unrelated subfamilies became so small (37,000 in 1967) that beginning with the data for 1968 (and beginning with the census data for 1960) the Bureau of the Census includes persons in these unrelated subfamilies in the count of secondary individuals.

Veteran Status—If a person served at any time during the four most recent wartime periods, the codes for all periods of service are entered. A person can report up to 4 periods of service. The following codes are used:

0 Children under 15
1 September 2001 or later
2 August 1990 to August 2001
3 May 1975 to July 1990
4 Vietnam era (Aug 1964 to Apr 1975)
5 February 1955 to July 1964
6 Korean War (July 1950 to January 1955)
7 January 1947 to June 1950
8 World War II (December 1941 to December 1946)
9 November 1941 or earlier

Wage and Salary Workers—Wage and salary workers receive wages, salary, commission, tips, or pay in kind from a private employer or from a governmental unit. Also included are persons who are self-employed in an incorporated business.

Workers—(See Labor Force--Employed.)

Work Experience—Includes those persons who during the preceding calendar year did any work for pay or profit or worked without pay on a family-operated farm or business at any time during the year, on a part-time or full-time basis.

Year-Round Full-Time Worker—A year-round full-time worker is one who usually worked 35 hours or more per week for 50 weeks or more during the preceding calendar year.

ATTACHMENT 5

HOW TO USE THE RECORD LAYOUT

Data users familiar with the CPS data files in prior years will see many similarities between the format of this file and those files released before January 1994. As in the past, there are numeric locations on the file which correspond to each variable. There is only one record layout which contains the variables for children, adults, and armed forces members. In prior years, each type of person had a separate record layout.

Item Naming Conventions

- The first character of each variable name is one of the following:

  H - Household item
  G - Geography item
  * P - Person item (includes adult items, child items, and armed forces items)

  * There is no need to distinguish adult, child, and armed forces items in the variable names in the new system. The recode **PRPERTYP** (located in positions 161-162) tells you what category the person is in.

- The second character of each variable name is one of the following:

  E - Edited item
  U - Unedited item
  X- Allocation flag (see Attachment 15 for more information)
  W- Weight
  R - Recode
  T - Topcode

- The remaining characters describe the variable.

- For multiple entry items, the file contains a separate variable for each possible response. Each item has the same descriptive name but a number is added as the last digit. For example, Question 22A allows separate entries for up to 6 job search methods. The item names are **PELKM1** (this item is edited), **PULKM2**, (this item is unedited), **PULKM3**, etc. These items are located in positions 296-307 of the record layout.

SUPPLEMENT QUESTIONNAIRE

FEBRUARY 2025 ARTS BENCHMARKING SURVEY SUPPLEMENT

PRESUP This month we are asking additional questions concerning public participation in the arts.

Enter (1) to continue

A1A The following questions are about you and your spouse's activities during the last 12 months between February (Current day), 2024 and February (Current day), 2025.

During the last 12 months, did (name/you) work with pottery, ceramic, or jewelry?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A1B During the last 12 months, did (spouse/partner name) work with pottery, ceramics, or jewelry?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A2A During the last 12 months, did (name/you) do any leatherwork, metalwork, or woodwork?

(1) Yes

(2) No

(-2) Don't Know
(-3) Refused

A2B During the last 12 months, did (spouse/partner name) do any leatherwork, metalwork, or woodwork?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A3A During the last 12 months, did (name/you) do any weaving, crocheting, quilting, needlepoint, knitting, or sewing?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A3B During the last 12 months, did (spouse/partner name) do any weaving, crocheting, quilting, needlepoint, knitting, or sewing?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A4A During the last 12 months, did (name/you) play a musical instrument?

(1) Yes

(2) No

(-2) Don't Know
(-3) Refused

A4B During the last 12 months, did (spouse/partner name) play a musical instrument?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A5A During the last 12 months, did (name/you) do any acting?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A5B During the last 12 months, did (spouse/partner name) do any acting?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A6A During the last 12 months, did (name/you) perform or practice any dance?

(1) Yes

(2) No

(-2) Don't Know
(-3) Refused

A6B During the last 12 months, did (spouse/partner name) perform or practice any dance?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A7A During the last 12 months, did (name/you) do any social dancing, including dancing at weddings, clubs, or other social settings?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A7B During the last 12 months, did (spouse/partner name) do any social dancing, including dancing at weddings, clubs, or other social settings?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A8A During the last 12 months, did (name/you) perform or practice any singing?

(1) Yes

(2) No

(-2) Don't Know
(-3) Refused

A8B During the last 12 months, did (spouse/partner name) perform or practice any singing?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A9A During the last 12 months, did (name/you) create any films or videos as an artistic activity?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A9B During the last 12 months, did (spouse/partner name) create any films or videos as an artistic activity?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A10A During the last 12 months, did (name/you) take any photographs as an artistic activity?

(1) Yes

(2) No

(-2) Don't Know
(-3) Refused

A10B During the last 12 months, did (spouse/partner name) take any photographs as an artistic activity?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A11A During the last 12 months, did (name/you) create any other visual art, such as paintings, sculpture, or graphic designs, or digital art?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A11B During the last 12 months, did (you/(spouse/partner name)) create any other visual art, such as paintings, sculpture, or graphic designs, or digital art?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A12A During the last 12 months, did (name/you) do any creative writing, such as: fiction, non-fiction, poetry, or plays?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A12B During the last 12 months, did (spouse/partner name) do any creative writing, such as: fiction, non-fiction, poetry, or plays?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A13CLA Considering all the activities we've asked you about, did you take any classes or lessons in any of these art forms during the last 12 months?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

A13CLB Considering all the activities we've asked you about, did (spouse/partner name) take any classes or lessons in any of these art forms during the last 12 months?

(1) Yes

(2) No

(-2) Don't Know
(-3) Refused

A14OPA Please indicate whether you strongly agree, agree, disagree, or strongly disagree with the next statement.

There are plenty of opportunities for me to take part in arts and cultural activities in my neighborhood or community.

(1) Strongly Agree
(2) Agree
(3) Disagree
(4) Strongly Disagree

(-2) Don't Know
(-3) Refuse

A14OPB Please indicate whether you strongly agree, agree, disagree, or strongly disagree with the next statement.

There are plenty of opportunities for (spouse/partner name) to take part in arts and cultural activities in his/her neighborhood or community.

(1) Strongly Agree
(2) Agree
(3) Disagree
(4) Strongly Disagree

(-2) Don't Know
(-3) Refuse

B1A

The following questions are about you and your spouse's activities during the last 12 months between February (Current day), 2024 and February (Current day), 2025.

During the last 12 months, with the exception of elementary, middle or high school performances, did (name/you) go to a live music, theater, or dance performance?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B1B

During the last 12 months, with the exception of elementary, middle or high school performances, did (spouse/partner name) go to a live music, theater, or dance performance?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B2FESTA

During the last 12 months, with the exception of elementary, middle or high school performances, did (name/you) go to an outdoor festival that featured performing artists?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B2FESTB *During the last 12 months, with the exception of elementary, middle or high school performances,* did (spouse/partner name) go to an outdoor festival that featured performing artists?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B2A *During the last 12 months, with the exception of elementary, middle or high school performances,* did (name/you) go to a live book reading or a poetry or storytelling event?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B2B *During the last 12 months, with the exception of elementary or high school performances,* did (spouse/partner name) go to a live book reading or a poetry or storytelling event?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B4LIVEA *With the exception of elementary, middle or high school performances*, did (name/you) go to any live music, dance, or theater performance — other than the kinds I've asked about — during the last 12 months?

This may include: rock, folk, or country music concerts; rap or hip-hop performances; comedy/improv, magic shows, or circus acts.

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B4LIVEB *With the exception of elementary, middle or high school performances*, did (spouse/partner name) go to any live music, dance, or theater performance — other than the kinds I've asked about — during the last 12 months?

This may include: rock, folk, or country music concerts; rap or hip-hop performances; comedy/improv, magic shows, or circus acts.

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B3A *With the exception of elementary, middle or high school exhibits, during the last 12 months*, did (name/you) go to an art exhibit, such as paintings, sculpture, pottery, graphic design, or photography?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B3B *With the exception of elementary, middle or high school exhibits, during the last 12 months,* did (spouse/partner name) go to an art exhibit, such as paintings, sculpture, pottery, graphic design, or photography?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B6CRFTA *During the last 12 months*, did (name/you) go to a crafts fair or a visual arts festival?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B6CRFTB *During the last 12 months*, did (spouse/partner name) go to a crafts fair or a visual arts festival?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B4A *During the last 12 months,* did (name/you) go out to the movies or go see a film?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B4B *During the last 12 months,* did (spouse/partner name) go out to the movies or go see a film?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B5A *During the last 12 months,* did (name/you) visit or go see any buildings, neighborhoods, parks, or monuments because of their historical, architectural or design value?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B5B *During the last 12 months,* did (spouse/partner name) visit or go see any buildings, neighborhoods, parks, or monuments because of their historical, architectural or design value?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B12A *During the last 12 months,* with the exception of books required for work or school, did (name/you) read any novels or short stories, poetry, or plays?

(1) Yes

(2) No

(-2) Don't Know
(-3) Refused

B12B *During the last 12 months*, with the exception of books required for work or school, did (spouse/partner name) read any novels or short stories, poetry, or plays?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B13A1 The next three questions are about music or other arts performances, programs, or content you may have accessed through web streaming, recordings, or TV or radio broadcasts.

During the last 12 months, did (name/you) use a device to watch, read, listen to, and/or download any music or information about music?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B13B1 *During the last 12 months,* did (spouse/partner name) use a device to watch, read, listen to, and/or download any music or information about music?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B13A2 *During the last 12 months*, did (name/you) use a device to watch, read, listen to, and/or download any dance or theater performances, or information about these art forms?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B13B2 *During the last 12 months*, did (spouse/partner name) use a device to watch, read, listen to, and/or download any dance or theater performances, or information about these art forms?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B13A3 *During the last 12 months*, did (name/you) use a device to watch, read, listen to, and/or download any visual art or creative writing, or information about these art forms?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B13B3 *During the last 12 months*, did (spouse/partner name) use a device to watch, read, listen to, and/or download any visual art or creative writing, or information about these art forms?

(1) Yes
(2) No

(-2) Don't Know
(-3) Refused

B14OPA Please indicate whether you strongly agree, agree, disagree, or strongly disagree with the next statement.

There are plenty of opportunities for me to take part in arts and cultural activities in my neighborhood or community.

(1) Strongly Agree
(2) Agree
(3) Disagree
(4) Strongly Disagree

(-2) Don't Know
(-3) Refuse

B14OPB Please indicate whether you strongly agree, agree, disagree, or strongly disagree with the next statement.

There are plenty of opportunities for (spouse/partner name) to take part in arts and cultural activities in his/her neighborhood or community.

(1) Strongly Agree
(2) Agree
(3) Disagree
(4) Strongly Disagree

(-2) Don't Know
(-3) Refuse

ATTACHMENT 9

INDUSTRY CLASSIFICATION

2022 Census Industry Code List for Detailed Industry (4 digits) Starting January 2025

These categories are aggregated into 52 detailed groups and 14 major groups (see later in this attachment).
These codes correspond to Items PEIO1ICD and PEIO2ICD, in positions 856-859 and 864-867 of the Basic CPS record layout in all months, except the ASEC files. In the ASEC, these codes correspond to PEIOIND and INDUSTRY, in the Person record.

Note: The Census industry codes and NAICS codes are based on the 2022 North American Industry Classification System.

Industry 2022 Description	2022 Census Industry Code	2022 NAICS Code
The 2022 census industry code list has 266 codes including 7 military codes.		
Agriculture, Forestry, Fishing and Hunting, and Mining	0170-0490	11-21
Agriculture, Forestry, Fishing and Hunting	*0170-0290*	*11*
Crop production	0170	111
Animal production and aquaculture	0180	112
Forestry except logging	0190	1131, 1132
Logging	0270	1133
Fishing, hunting and trapping	0280	114
Support activities for agriculture and forestry	0290	115
Mining, Quarrying, and Oil and Gas Extraction	*0370-0490*	*21*

	Oil and gas extraction	0370	211
	Coal mining	0380	2121
	Metal ore mining	0390	2122
	Nonmetallic mineral mining and quarrying	0470	2123
	Not specified type of mining	0480	Part of 21
	Support activities for mining	0490	213
Construction		0770	23
	Construction (the cleaning of buildings and dwellings is incidental during construction and immediately after construction)	0770	23
Manufacturing		1070-3990	31-33
	Animal food, grain and oilseed milling	1070	3111, 3112
	Sugar and confectionery products	1080	3113
	Fruit and vegetable preserving and specialty food manufacturing	1090	3114
	Dairy product manufacturing	1170	3115
	Animal slaughtering and processing	1180	3116
	Retail bakeries	1190	311811
	Bakeries and tortilla manufacturing, except retail bakeries	1270	3118 exc. 311811
	Seafood and other miscellaneous foods, n.e.c.	1280	3117, 3119
	Not specified food industries	1290	Part of 311
	Beverage manufacturing	1370	3121
	Tobacco manufacturing	1390	3122
	Fiber, yarn, and thread mills	1470	3131
	Fabric mills, except knit fabric mills	1480	3132 exc. 31324
	Textile and fabric finishing and fabric coating mills	1490	3133
	Carpet and rug mills	1570	31411
	Textile product mills, except carpet and rug	1590	314 exc. 31411
	Knit fabric mills, and apparel knitting mills	1670	31324, 3151
	Cut and sew, and apparel accessories and other apparel manufacturing	1691	3152, 3159

Footwear manufacturing	1770	3162
Leather and hide tanning and finishing, and other leather and allied product manufacturing	1790	3161, 3169
Pulp, paper, and paperboard mills	1870	3221
Paperboard container manufacturing	1880	32221
Miscellaneous paper and pulp products manufacturing	1890	32222,32223, 32229
Printing and related support activities	1990	3231
Petroleum refineries	2070	32411
Petroleum and coal products manufacturing, except petroleum refineries	2090	32412, 32419
Resin, synthetic rubber, and artificial and synthetic fibers and filaments manufacturing	2170	3252
Pesticide, fertilizer, and other agricultural chemical manufacturing	2180	3253
Pharmaceutical and medicine manufacturing	2190	3254
Paint, coating, and adhesive manufacturing	2270	3255
Soap, cleaning compound, and toilet preparation manufacturing	2280	3256
Basic chemical manufacturing, and other chemical product and preparation manufacturing	2290	3251, 3259
Plastics product manufacturing	2370	3261
Tire manufacturing	2380	32621
Rubber products, except tires, manufacturing	2390	32622, 32629
Pottery, ceramics, and plumbing fixture manufacturing	2470	32711
Clay building material and refractories manufacturing	2480	32712
Glass and glass product manufacturing	2490	3272
Cement, concrete, lime, and gypsum product manufacturing	2570	3273, 3274
Other nonmetallic mineral product manufacturing	2590	3279
Iron and steel mills and steel product manufacturing	2670	3311, 3312
Alumina and aluminum production and processing	2680	3313
Nonferrous metal (except aluminum) production and processing	2690	3314
Foundries	2770	3315
Forging and stamping	2780	3321

Cutlery and handtool manufacturing	2790	3322
Architectural and structural metals, and boiler, tank, and shipping container manufacturing	2870	3323, 3324
Machine shops; turned product; screw, nut, and bolt manufacturing	2880	3327
Coating, engraving, heat treating, and allied activities	2890	3328
Ordnance	2970	332992, 332993, 332994
Miscellaneous fabricated metal product manufacturing	2980	3325, 3326, 3329 exc. 332992, 332993, 332994
Not specified metal industries	2990	Part of 331 and 332
Agricultural implement manufacturing	3070	33311
Construction, and mining and oil and gas field machinery manufacturing	3080	33312, 33313
Commercial and service industry machinery manufacturing	3095	3333
Metalworking machinery manufacturing	3170	3335
Engine, turbine, and power transmission equipment manufacturing	3180	3336
Machinery manufacturing, n.e.c. or not specified	3291	3332, 3334, 3339, Part of 333
Computer and peripheral equipment manufacturing	3365	3341
Communications, audio, and video equipment manufacturing	3370	3342, 3343
Navigational, measuring, electromedical, and control instruments manufacturing	3380	3345
Semiconductor, magnetic and optical media, and other electronic component manufacturing	3390	3344, 3346
Household appliance manufacturing	3470	3352
Electric lighting and electrical equipment manufacturing, and other electrical component manufacturing, n.e.c.	3490	3351, 3353, 3359
Motor vehicles and motor vehicle equipment manufacturing	3570	3361, 3362, 3363
Aircraft, aircraft engine, and aircraft parts manufacturing	3580	336411, 336412, 336413

Guided missile and space vehicle and parts manufacturing	3590	336414, 336415, 336419
Railroad rolling stock manufacturing	3670	3365
Ship and boat building	3680	3366
Other transportation equipment manufacturing	3690	3369
Sawmills and wood preservation	3770	3211
Veneer, plywood, and engineered wood product manufacturing	3780	3212
Manufactured home (mobile home) and prefabricated wood building manufacturing	3790	321991, 321992
Miscellaneous wood product manufacturing	3875	3219 exc. 321991, 321992
Furniture and related product manufacturing	3895	337
Medical equipment and supplies manufacturing	3960	3391
Sporting and athletic goods, and doll, toy and game manufacturing	3970	33992, 33993
Miscellaneous manufacturing, n.e.c.	3980	3399 exc. 33992, 33993
Not specified manufacturing industries	3990	Part of 31, 32, 33
Wholesale Trade	4070-4590	42
Motor vehicle and motor vehicle parts and supplies merchant wholesalers	4070	4231
Furniture and home furnishing merchant wholesalers	4080	4232
Lumber and other construction materials merchant wholesalers	4090	4233
Professional and commercial equipment and supplies merchant wholesalers	4170	4234
Metal and mineral, except petroleum, merchant wholesalers	4180	4235
Household appliances and electrical and electronic goods merchant wholesalers	4195	4236
Hardware, and plumbing and heating equipment, and supplies merchant wholesalers	4265	4237
Machinery, equipment, and supplies merchant wholesalers	4270	4238

	Recyclable material merchant wholesalers	4280	42393
	Miscellaneous durable goods, except recyclable material, merchant wholesalers	4290	4239 exc. 42393
	Paper and paper product merchant wholesalers	4370	4241
	Drugs, druggists' sundries, and chemical and allied products merchant wholesalers	4380	4242, 4246
	Apparel, piece goods, and notions merchant wholesalers	4390	4243
	Grocery and related product merchant wholesalers	4470	4244
	Farm product raw material merchant wholesalers	4480	4245
	Petroleum and petroleum products merchant wholesalers	4490	4247
	Beer, wine, and distilled alcoholic beverage merchant wholesalers	4560	4248
	Farm supplies merchant wholesalers	4570	42491
	Miscellaneous nondurable goods merchant, except farm supplies, wholesalers	4580	4249 exc. 42491
	Wholesale trade agents and brokers	4585	4251
	Not specified wholesale trade	4590	Part of 42
Retail Trade		4670-5791	44-45
	Automobile dealers	4670	4411
	Other motor vehicle dealers	4681	4412
	Automotive parts, accessories, and tire retailers	4691	4413
	Furniture and home furnishings retailers	4771	4491
	Electronics and appliance retailers	4796	4492
	Building material and supplies dealers, except hardware retailers	4871	4441 exc. 44414
	Hardware retailers	4881	44414
	Lawn and garden equipment and supplies retailers	4891	4442
	Supermarkets and other grocery (except convenience) retailers	4971	44511
	Convenience retailers and vending machine operators	4973	44513
	Specialty food retailers	4981	4452
	Beer, wine, and liquor retailers	4991	4453
	Pharmacies and drug retailers	5071	45611

Health and personal care, except pharmacies and drug, retailers	5081	4561 exc. 45611
Gasoline stations	5090	4571
Clothing and clothing accessories retailers	5171	4581
Shoe retailers	5181	4582
Jewelry, luggage, and leather goods retailers	5191	4583
Sporting goods, and hobby, toy, and game retailers	5276	45911, 45912
Sewing, needlework, and piece goods retailers	5281	45913
Musical instrument and supplies retailers	5296	45914
Book retailers and news dealers	5371	45921
Department stores	5382	4551
Warehouse clubs, supercenters, and other general merchandise retailers	5392	4552
Florists	5471	4593
Office supplies and stationery retailers	5481	45941
Used merchandise retailers	5491	4595
Gift, novelty, and souvenir retailers	5571	45942
Other miscellaneous retailers	5581	4599
Fuel dealers	5680	4572
Not specified retail trade	5791	Part of 44, 45
Transportation and Warehousing, and Utilities	6070-6390, 0570-0690	48-49, 22
Transportation and Warehousing	*6070-6390*	*48-49*
Air transportation	6070	481
Rail transportation	6080	482
Water transportation	6090	483
Truck transportation	6170	484
Transit and ground passenger transportation, except taxi and limousine service	6180	4851, 4852, 4854, 4855, 4859
Taxi and limousine service	6190	4853
Pipeline transportation	6270	486

	Scenic and sightseeing transportation	6280	487
	Support activities for transportation	6290	488
	Postal Service	6370	491
	Couriers and messengers	6380	492
	Warehousing and storage	6390	493
	Utilities	*0570-0690*	*22*
	Electric power generation, transmission and distribution	0570	2211
	Natural gas distribution	0580	2212
	Electric and gas, and other combinations	0590	Pts. 2211, 2212
	Water supply and irrigation systems, and steam and air-conditioning supply	0670	22131, 22133
	Sewage treatment facilities	0680	22132
	Not specified utilities	0690	Part of 22
Information		6471-6781	51
	Newspaper publishers	6471	51311
	Periodical, book, and directory and mailing list, and other publishers	6481	5131 exc. 51311
	Software publishers	6490	5132
	Motion pictures and video industries	6570	5121
	Sound recording industries	6590	5122
	Broadcasting and content providers	6671	516
	Wired telecommunications carriers	6680	517111
	Telecommunications, except wired telecommunications carriers	6690	517 exc. 517111
	Computing infrastructure providers, data processing, web hosting, and related services	6695	5182
	Libraries and archives	6770	51921
	Web search portals and all other information services	6781	51929

Finance and Insurance, and Real Estate, and Rental and Leasing	6871-7190	52-53

Finance and Insurance	*6871-6992*	*52*
Monetary authorities-central bank, and commercial banking	6871	521, 52211
Credit unions, and savings institutions and other depository credit intermediation	6881	52213, 52218
Nondepository credit intermediation and related activities	6890	5222, 5223
Securities, commodities, funds, trusts, and other financial investments	6970	523, 525
Insurance carriers	6991	5241
Agencies, brokerages, and other insurance related activities	6992	5242
Real Estate and Rental and Leasing	*7071-7190*	*53*
Lessors of real estate, and offices of real estate agents and brokers	7071	5311, 5312
Activities related to real estate	7072	5313
Automotive equipment rental and leasing	7080	5321
Consumer goods rental, and general rental centers	7181	5322, 5323
Commercial and industrial machinery and equipment, and nonfinancial intangible assets rental and leasing	7190	5324, 533
Professional, Scientific, and Management, and Administrative, and Waste Management Services	7270-7790	54-56
Professional, Scientific, and Technical Services	*7270-7490*	*54*
Legal services	7270	5411
Accounting, tax preparation, bookkeeping, and payroll services	7280	5412
Architectural, engineering, and related services	7290	5413
Specialized design services	7370	5414

Computer systems design and related services	7380	5415
Management, scientific, and technical consulting services	7390	5416
Scientific research and development services	7460	5417
Advertising, public relations, and related services	7470	5418
Veterinary services	7480	54194
Other professional, scientific, and technical, except veterinary, services	7490	5419 exc. 54194
Management of companies and enterprises	*7570*	*55*
Management of companies and enterprises	7570	55
Administrative and support and waste management services	*7580-7790*	*56*
Employment services	7580	5613
Business support services	7590	5614
Travel arrangements and reservation services	7670	5615
Investigation and security services	7680	5616
Services to buildings and dwellings, except landscaping services	7690	5617 exc. 56173
Landscaping services	7770	56173
Other administrative and other support services	7780	5611, 5612, 5619
Waste management and remediation services	7790	562
Educational Services, and Health Care and Social Assistance	7860-8470	61-62
Educational Services	*7860-7890*	*61*
Elementary and secondary schools	7860	6111
Junior colleges, colleges, universities, and professional schools	7870	6112, 6113
Business, trade and technical schools, and computer and management training	7880	6114, 6115

Other schools and instruction, and educational support services	7890	6116, 6117
Health Care and Social Assistance	*7970-8470*	*62*
Offices of physicians	7970	6211
Offices of dentists	7980	6212
Offices of chiropractors	7990	62131
Offices of optometrists	8070	62132
Offices of other health practitioners	8080	6213 exc. 62131, 62132
Outpatient care centers	8090	6214
Home health care services	8170	6216
Other health care services	8180	6215, 6219
General medical and surgical hospitals, and specialty (except psychiatric and substance abuse) hospitals	8191	6221, 6223
Psychiatric and substance abuse hospitals	8192	6222
Nursing care facilities (skilled nursing facilities)	8270	6231
Residential care facilities, except skilled nursing facilities	8290	6232, 6233, 6239
Individual and family services	8370	6241
Community food and housing, and emergency and other relief services	8380	6242
Vocational rehabilitation services	8390	6243
Child care services	8470	6244
Arts, Entertainment, and Recreation, and Accommodation and Food Services	8561-8690	71-72
Arts, Entertainment, and Recreation	*8561-8590*	*71*
Performing arts companies	8561	7111
Spectator sports	8562	7112
Promoters of performing arts, sports, and similar events, agents and managers for artists, athletes, entertainers, and other public figures	8563	7113, 7114
Independent artists, writers, and performers	8564	7115

Museums, historical sites, and similar institutions	8570	712
Bowling centers	8580	71395
Other amusement, gambling, and recreation industries	8590	713 exc. 71395
Accommodation and Food Services	*8660-8690*	*72*
Traveler accommodation	8660	7211
Recreational vehicle parks and camps, and rooming and boarding houses, dormitories, and workers' camps	8670	7212, 7213
Food services and drinking places, except alcoholic beverages	8680	722 exc. 7224
Drinking places (alcoholic beverages)	8690	7224
Other Services, Except Public Administration	8770-9290	81
Automotive repair and maintenance, except car washes	8770	8111 exc. 811192
Car washes	8780	811192
Electronic and precision equipment repair and maintenance	8790	8112
Commercial and industrial machinery and equipment repair and maintenance	8870	8113
Personal and household goods repair and maintenance	8891	8114
Barber shops	8970	812111
Beauty salons	8980	812112
Nail salons and other personal care services	8990	812113, 81219
Drycleaning and laundry services	9070	8123
Death care services	9080	8122
Other personal services	9090	8129
Religious organizations	9160	8131
Civic, social, advocacy organizations, and grantmaking and giving services	9170	8132, 8133, 8134
Labor unions and similar labor organizations	9180	81393
Business, professional, political, and similar organizations	9190	8139 exc. 81393
Private households	9290	814

Public Administration	9370-9590	92
Executive offices and legislative bodies	9370	92111, 92112, 92114, pt. 92115
Public finance activities	9380	92113
Other general government and support	9390	92119
Justice, public order, and safety activities	9470	922, pt. 92115
Administration of human resource programs	9480	923
Administration of environmental quality, and housing programs, urban planning and community development	9490	924, 925
Administration of economic programs and space research and technology	9570	926, 927
National security and international affairs	9590	92812, pt. 92811
Military	9670-9870	pt. 92811
U. S. Army	9670	pt. 92811
U. S. Air Force	9680	pt. 92811
U. S. Navy	9690	pt. 92811
U. S. Marines	9770	pt. 92811
U. S. Coast Guard	9780	pt. 92811
Armed Forces, Branch not specified	9790	pt. 92811
Military Reserves or National Guard	9870	pt. 92811
Unemployed, last worked 5 years ago or earlier or never worked	9920	

Detailed Industry Recodes

(01-52)

These codes correspond to Items PRDTIND1 and PRDTIND2 in positions 472-475 of the Basic CPS record layout ASEC. In ASEC, these codes correspond to Item

CODE	DESCRIPTION	INDUSTRY CODE
1	Agriculture	0170 – 0180, 0290
2	Forestry, logging, fishing, hunting, and trapping	0190 - 0280
3	Mining	0370 - 0490
4	Construction	770
5	Nonmetallic mineral products	2470 - 2590
6	Primary metals and fabricated metal products	2670 - 2990
7	Machinery manufacturing	3070 - 3291
8	Computer and electronic products	3365 - 3390
9	Electrical equipment, appliance manufacturing	3470, 3490
10	Transportation equipment manufacturing	3570 - 3690

ATTACHMENT 10

OCCUPATION CLASSIFICATION

(Beginning January 2020)

These categories are aggregated into 23 detailed groups and 11 major groups (see pages 10-17 and 10-18). The codes in the right hand column are the 2018 SOC equivalent.

These codes correspond to items PTIO1OCD and PTIO2OCD in positions 860-863 and 868-871 of the Basic CPS record layout in all months, **except the ASEC files**. In **ASEC**, these codes correspond to items PEIOOCC and OCCUP of the Persons Record. These codes are also applicable for any other CPS supplements that collect occupation data.

2018 CENSUS CODE	DESCRIPTION	2018 SOC CODE
	Management, Business, Science, and Arts Occupations	
	Management Occupations	
0010	Chief executives	11-1011
0020	General and operations managers	11-1021
0040	Advertising and promotions managers	11-2011
0051	Marketing managers	11-2021
0052	Sales managers	11-2022

7430	Precision instrument and equipment repairers	49-9060
7510	Coin, vending, and amusement machine servicers and repairers	49-9091
7540	Locksmiths and safe repairers	49-9094
7560	Riggers	49-9096
7610	Helpers--installation, maintenance, and repair workers	49-9098
7640	Other installation, maintenance, and repair workers	49-90XX

2018 CENSUS CODE	DESCRIPTION	2018 SOC CODE
Production, Transportation, and Material Moving Occupations		
	Production Occupation	
7700	First-line supervisors of production and operating workers	51-1011
7720	Electrical, electronics, and electromechanical assemblers	51-2020
7730	Engine and other machine assemblers	51-2031
7740	Structural metal fabricators and fitters	51-2041
7750	Other assemblers and fabricators	51-20XX
7800	Bakers	51-3011
7810	Butchers and other meat, poultry, and fish processing workers	51-3020
7830	Food and tobacco roasting, baking, and drying machine operators and tenders	51-3091
7840	Food batchmakers	51-3092
7850	Food cooking machine operators and tenders	51-3093
7855	Food processing workers, all other	51-3099
7905	Computer numerically controlled tool operators and programmers	51-9160
7925	Forming machine setters, operators, and tenders, metal and plastic	51-4020
7950	Cutting, punching, and press machine setters, operators, and tenders, metal and plastic	51-4031
8000	Grinding, lapping, polishing, and buffing machine tool setters, operators, and tenders, metal and plastic	51-4033
8025	Other machine tool setters, operators, and tenders, metal and plastic	51-403X
8030	Machinists	51-4041
8040	Metal furnace operators, tenders, pourers, and casters	51-4050
8100	Model makers, patternmakers, and molding machine setters, metal and plastic	51-40XX
8130	Tool and die makers	51-4111
8140	Welding, soldering, and brazing workers	51-4120
8225	Other metal workers and plastic workers	51-4XXX
8250	Prepress technicians and workers	51-5111
8255	Printing press operators	51-5112
8256	Print binding and finishing workers	51-5113
8300	Laundry and dry-cleaning workers	51-6011
8310	Pressers, textile, garment, and related materials	51-6021
8320	Sewing machine operators	51-6031
8335	Shoe and leather workers	51-6040
8350	Tailors, dressmakers, and sewers	51-6050
8365	Textile machine setters, operators, and tenders	51-6060
8450	Upholsterers	51-6093
8465	Other textile, apparel, and furnishings workers	51-609X
8500	Cabinetmakers and bench carpenters	51-7011
8510	Furniture finishers	51-7021
8530	Sawing machine setters, operators, and tenders, wood	51-7041
8540	Woodworking machine setters, operators, and tenders, except sawing	51-7042
8555	Other woodworkers	51-70XX
8600	Power plant operators, distributors, and dispatchers	51-8010
8610	Stationary engineers and boiler operators	51-8021
8620	Water and wastewater treatment plant and system operators	51-8031
8630	Miscellaneous plant and system operators	51-8090

2018 CENSUS CODE	DESCRIPTION	2018 SOC CODE
8640	Chemical processing machine setters, operators, and tenders	51-9010
8650	Crushing, grinding, polishing, mixing, and blending workers	51-9020
8710	Cutting workers	51-9030
8720	Extruding, forming, pressing, and compacting machine setters, operators, and tenders	51-9041
8730	Furnace, kiln, oven, drier, and kettle operators and tenders	51-9051
8740	Inspectors, testers, sorters, samplers, and weighers	51-9061
8750	Jewelers and precious stone and metal workers	51-9071
8760	Dental and ophthalmic laboratory technicians and medical appliance technicians	51-9080
8800	Packaging and filling machine operators and tenders	51-9111
8810	Painting workers	51-9120
8830	Photographic process workers and processing machine operators	51-9151
8850	Adhesive bonding machine operators and tenders	51-9191
8910	Etchers and engravers	51-9194
8920	Molders, shapers, and casters, except metal and plastic	51-9195
8930	Paper goods machine setters, operators, and tenders	51-9196
8940	Tire builders	51-9197
8950	Helpers--production workers	51-9198
8990	Miscellaneous production workers, including equipment operators and tenders	51-91XX
	Transportation and Material Moving Occupations	
	Transportation Occupations:	
9005	Supervisors of transportation and material moving workers	53-1000
9030	Aircraft pilots and flight engineers	53-2010
9040	Air traffic controllers and airfield operations specialists	53-2020
9050	Flight attendants	53-2031
9110	Ambulance drivers and attendants, except emergency medical technicians	53-3011
9121	Bus drivers, school	53-3051
9122	Bus drivers, transit and intercity	53-3052
9130	Driver/sales workers and truck drivers	53-3030
9141	Shuttle drivers and chauffeurs	53-3053
9142	Taxi drivers	53-3054
9150	Motor vehicle operators, all other	53-3099
9210	Locomotive engineers and operators	53-4010
9240	Railroad conductors and yardmasters	53-4031
9265	Other rail transportation workers	53-40XX
9300	Sailors and marine oilers, and ship engineers	53-50XX
9310	Ship and boat captains and operators	53-5020
9350	Parking attendants	53-6021
9365	Transportation service attendants	53-6030
9410	Transportation inspectors	53-6051
9415	Passenger attendants	53-6061
9430	Other transportation workers	53-60XX

2018 CENSUS CODE	DESCRIPTION	2018 SOC CODE
	Material Moving Occupations	
9510	Crane and tower operators	53-7021
9570	Conveyor, dredge, and hoist and winch operators	53-70XX
9600	Industrial truck and tractor operators	53-7051
9610	Cleaners of vehicles and equipment	53-7061
9620	Laborers and freight, stock, and material movers, hand	53-7062

9760	Other material moving workers	53-71XX
	Military Specific Occupations	
9840	Military Specific Occupations	55-0000

Detailed Occupation Recodes
(01-23)

These codes correspond to Items PRDTOCC1 and PRDTOCC2 in positions 476-479 of the Basic CPS record layout in all months, **except the ASEC files**. In **ASEC**, these codes correspond to Item A_DTOCC.

CODE	CODE DESCRIPTION	OCCUPATION CODE
1	Management occupations	0010-0440
2	Business and financial operations occupations	0500-0960
3	Computer and mathematical occupations	1005-1240
4	Architecture and engineering occupations	1305-1560
5	Life, physical, and social science occupations	1600-1980
6	Community and social service occupation	2001-2060
7	Legal occupations	2100-2180
8	Education, training, and library occupations	2205-2555
9	Arts, design, entertainment, sports, and media occupations	2600-2920
10	Healthcare practitioner and technical occupations	3000-3550
11	Healthcare support occupations	3601-3655
12	Protective service occupations	3700-3960
13	Food preparation and serving related occupations	4000-4160
14	Building and grounds cleaning and maintenance occupations	4200-4255
15	Personal care and service occupations	4330-4655
16	Sales and related occupations	4700-4965
17	Office and administrative support occupations	5000-5940
18	Farming, fishing, and forestry occupations	6005-6130
19	Construction and extraction occupations	6200-6950
20	Installation, maintenance, and repair occupations	7000-7640
21	Production occupations	7700-8990
22	Transportation and material moving occupations	9005-9760
23	Military specific occupations	9840

Major Occupation Group Recodes
(01-11)

These codes correspond to Items PRMJOCC1 and PRMJOCC2 located in positions 482-485 of the Basic CPS record layout in all months, **except the ASEC files**. In **ASEC**, these codes correspond to Item A_MJOCC.

CODE	CODE DESCRIPTION	OCCUPATION CODE

ATTACHMENT 11

Specific Metropolitan Identifiers

(Geographic Attachment for CPS Public Use File Documentation Beginning August, 2015)

List 1. FIPS Metropolitan Area (CBSA) Codes

List 2. FIPS Consolidated Statistical Area (CSA) Codes

List 3. Individual Principal Cities

List 4: FIPS County Codes

Unless otherwise noted, all definitions for geographic areas on these lists reflect the February 28, 2013 OMB definitions. For an explanation of the geographic suppression changes that went into effect in January 2023, please see: Changes to 2023 CPS Public Use Microdata Files (census.gov)

LIST 1: FIPS Metropolitan Area (CBSA) Codes

Metropolitan Areas are defined using February 28, 2013 OMB definitions.

FIPS Code	Metropolitan (CBSA) TITLE
10180	Abilene, TX
10420	Akron, OH
10580	Albany-Schenectady-Troy, NY
10740	Albuquerque, NM
10900	Allentown-Bethlehem-Easton, PA-NJ
11100	Amarillo, TX
11460	Ann Arbor, MI
11540	Appleton, WI
11700	Asheville, NC
12020	Athens-Clarke County, GA
12060	Atlanta-Sandy Springs-Roswell, GA
12100	Atlantic City-Hammonton, NJ
12220	Auburn-Opelika, AL
12260	Augusta-Richmond County, GA-SC
12420	Austin-Round Rock, TX
12540	Bakersfield, CA
12580	Baltimore-Columbia-Towson, MD
12620	Bangor, ME
12700	Barnstable, MA
12940	Baton Rouge, LA
12980	Battle Creek, MI
13140	Beaumont-Port Arthur, TX
13460	Bend-Redmond, OR
13740	Billings, MT
13780	Binghamton, NY
13820	Birmingham-Hoover, AL
13980	Blacksburg—Christiansburg-Radford, VA
14010	Bloomington, IL
14020	Bloomington, IN
14260	Boise City, ID
14460	Boston-Cambridge-Newton, MA-NH
14500	Boulder, CO
14540	Bowling Green, KY
14860	Bridgeport-Stamford-Norwalk, CT

FIPS Code	Metropolitan (CBSA) TITLE
15180	Brownsville-Harlingen, TX
15380	Buffalo-Cheektowaga-Niagara Falls, NY
15500	Burlington, NC
15540	Burlington-South Burlington, VT
15680	California-Lexington Park, MD
15940	Canton-Massillon, OH
15980	Cape Coral-Fort Myers, FL
16060	Carbondale-Marion, IL
16300	Cedar Rapids, IA
16540	Chambersburg-Waynesboro, PA
16580	Champaign-Urbana, IL
16620	Charleston, WV
16700	Charleston-North Charleston, SC
16740	Charlotte-Concord-Gastonia, NC-SC
16820	Charlottesville, VA
16860	Chattanooga, TN-GA
16980	Chicago-Naperville-Elgin, IL-IN-WI
17020	Chico, CA
17140	Cincinnati, OH-KY-IN
17300	Clarksville, TN-KY
17420	Cleveland, TN
17460	Cleveland-Elyria, OH
17660	Coeur d'Alene, ID
17780	College Station-Bryan, TX
17820	Colorado Springs, CO
17900	Columbia, SC
17980	Columbus, GA-AL
18140	Columbus, OH
18580	Corpus Christi, TX
19100	Dallas-Fort Worth-Arlington, TX
19300	Daphne-Fairhope-Foley, AL
19340	Davenport-Moline-Rock Island, IA-IL
19380	Dayton, OH
19660	Deltona-Daytona Beach-Ormond Beach, FL
19740	Denver-Aurora-Lakewood, CO
19780	Des Moines-West Des Moines, IA
19820	Detroit-Warren-Dearborn, MI
20100	Dover, DE
20500	Durham-Chapel Hill, NC
20700	East Stroudsburg, PA

FIPS Code	Metropolitan (CBSA) TITLE
21140	Elkhart-Goshen, IN
21340	El Paso, TX
21500	Erie, PA
21660	Eugene, OR
21780	Evansville, IN-KY
22020	Fargo, ND-MN
22140	Farmington, NM

49740	Yuma, AZ

LIST 2: FIPS Consolidated Statistical Area (CSA) Codes

The following CSA's (Combined Statistical Areas) contain 2 or more Metropolitan Statistical Areas that are in the CPS sample and are individually identified on the public use files. Micropolitan Statistical Areas are not specifically identified in the CPS and are not used to identify CSA's nor are parts of such areas coded as belonging to CSA's. The component CBSA's identified on the CPS Public Use Files are listed for each CSA.

CSA Code	CBSA Code	CSA Title Component Parts (CBSA's)
104		Albany-Schenectady, NY
	10580	Albany-Schenectady-Troy, NY
	24020	Glen Falls, NY
106		Albuquerque-Santa Fe-Las Vegas, NM
	10740	Albuquerque, NM
	42140	Santa Fe, NM
118		Appleton-Oshkosh-Neenah, WI
	11540	Appleton, WI
	36780	Oshkosh-Neenah, WI
122		Atlanta--Athens-Clarke County—Sandy Springs, GA
	12020	Athens-Clarke County, GA
	12060	Atlanta-Sandy Springs-Roswell, GA
	23580	Gainesville, GA
148		Boston-Worcester-Providence, MA-RI-NH-CT
	12700	Barnstable Town, MA
	14460	Boston-Cambridge-Newton-MA-NH
	31700	Manchester-Nashua, NH
	39300	Providence-Warwick, RI-MA
	49340	Worcester, MA-CT
162		Cape Coral-Fort Myers-Naples, FL
	15980	Cape Coral, FL
	34940	Naples-Immokalee-Marco Island, FL

List 3: Individual Principal Cities

Please Note: You must use the CBSA code in combination with the city code to uniquely identify principal cities. If a county name is provided, you must incorporate the county code into any algorithm used to tabulate a specific city's characteristics. The same applies to state codes for multi-state CBSA's.

CBSA Code	Title City	GTINDVPC

* Counties marked with an asterisk (*) are also single county Micropolitan Statistical Areas.

They are not otherwise identified on the files. A list of such areas on the files is as follows:

CBSA Code	Title	County Name	County Code
12300	Augusta-Waterville, ME	Kennebec	005
18180	Concord, NH	Merrimack	011
26090	Holland, MI	Allegan	005
31300	Lumberton, NC	Robeson	155
39060	Pottsville, PA	Schuylkill	107
45860	Torrington, CT	Litchfield	005

ATTACHMENT 12

Dynamic Topcoding of Usual
Hourly Earnings

The Census Bureau has introduced a dynamic topcode, implemented monthly, with topcoding applied to the top 3 percent of hourly earnings reported. This method results in fewer cases being topcoded compared to the previous method which applied topcoding based on the individual's usual hours worked variable. For individuals whose earnings are topcoded, the earnings variable contains the weighted average of the top 3% and not a cutoff value as has been done in past years. PTERNHLY, PTERNH1O, PTERNH2, and PTERNH1C are the hourly reporting variables. Below is an example of this process using fake data.

Hourly Wages	Cumulative Percent	Topcoding (Weighted Average of Top 3%)
2	0.15	2
2.15	0.26	2.15
3.50	0.90	3.50
.	.	.
.	.	.
.	.	.
46.5	96.90	46.5
47	96.93	47
49.5	97.06	64.20
50	97.46	64.20
51	97.55	64.20
.		.
.		.
.		.
65	99.40	64.20
68	99.45	64.20
70	99.60	64.20
75	99.75	64.20
85	99.80	64.20
90	100.00	64.20

Furthermore, values not topcoded as above, will be rounded based on the criteria below.

Usual Hourly Earning as Reported	Rounded value on Public Use File
$00.01 - $00.07	$00.05
$00.08 - $29.99	Nearest $00.05
$30.00 - $49.99	Nearest $00.25
$50.00 +	Nearest $00.50 until topcoded

ALLOCATION FLAGS

Current Population Survey

For every edited item, there is a corresponding allocation flag with the prefix "PX". The last six characters of the names are the same. For example, PXMLR is the allocation flag for PEMLR. All allocation flags have the following list of possible values.

00 VALUE - NO CHANGE
01 BLANK - NO CHANGE
02 DON'T KNOW - NO CHANGE
03 REFUSED - NO CHANGE
10 VALUE TO VALUE
11 BLANK TO VALUE
12 DON'T KNOW TO VALUE
13 REFUSED TO VALUE
20 VALUE TO LONGITUDINAL VALUE
21 BLANK TO LONGITUDINAL VALUE
22 DON'T KNOW TO LONGITUDINAL VALUE
23 REFUSED TO LONGITUDINAL VALUE
30 VALUE TO ALLOCATED VALUE LONG.
31 BLANK TO ALLOCATED VALUE LONG.
32 DON'T KNOW TO ALLOCATED VALUE LONG.
33 REFUSED TO ALLOCATED VALUE LONG.
40 VALUE TO ALLOCATED VALUE
41 BLANK TO ALLOCATED VALUE
42 DON'T KNOW TO ALLOCATED VALUE
43 REFUSED TO ALLOCATED VALUE
50 VALUE TO BLANK

Source of the Data and Accuracy of the Estimates for the February 2025 Current Population Survey Microdata File on the Arts Benchmark Survey

SOURCE OF THE DATA

The data in this microdata file are from the February 2025 Current Population Survey (CPS). The U.S. Census Bureau conducts the CPS every month, although this file has only February data. The February survey uses two sets of questions, the basic CPS and a set of supplemental questions. The CPS, sponsored jointly by the Census Bureau and the U.S. Bureau of Labor Statistics, is the country's primary source of labor force statistics for the civilian noninstitutionalized population. The National Endowment of the Arts sponsors the supplemental questions for February.

Basic CPS. The monthly CPS collects primarily labor force data about the civilian noninstitutionalized population living in the United States. The institutionalized population, which is excluded from the universe, consists primarily of the population in correctional institutions and nursing homes (98 percent of the 3.8 million institutionalized people in the 2020 Census). Starting in August 2017, college and university dormitories were also excluded from the universe because most of the residents had usual residences elsewhere. Interviewers ask questions concerning labor force participation of each member 15 years old and older in sample households. Typically, the week containing the nineteenth of the month is the interview week. The week containing the twelfth is the reference week (i.e., the week about which the labor force questions are asked).

The CPS uses a multistage probability sample based on the results of the decennial census, with coverage in all 50 states and the District of Columbia. The sample is continually updated to account for new residential construction. When files from the most recent decennial census become available, the Census Bureau gradually introduces a new sample design for the CPS.

Every ten years, the CPS first-stage sample is redesigned[1] reflecting changes based on the most recent decennial census. In the first stage of the sampling process, primary sampling units (PSUs)[2] were selected for sample. In the 2010 sample design, the United States was divided into 1,987 PSUs. These PSUs were then grouped into 852 strata. Within each stratum, a single PSU was chosen for the sample, with its probability of selection proportional to its population as of the most recent decennial census. In the case of strata consisting of only one PSU, the PSU was chosen with certainty.

Approximately 69,500 sampled addresses were selected from the sampling frame in February. Based on eligibility criteria, seven percent of these sampled addresses were sent directly to computer-assisted telephone interviewing (CATI). The remaining sampled

[1] For detailed information on the 2010 sample redesign, please see Bureau of Labor Statistics (2014).

[2] The PSUs correspond to substate areas (i.e., counties or groups of counties) that are geographically contiguous.

addresses were assigned to interviewers for computer-assisted personal interviewing (CAPI).[3] Of all addresses in sample, about 60,000 were determined to be eligible for interview. Interviewers obtained interviews at about 41,000 of the housing units at these addresses.[4] Noninterviews occur when the occupants are not found at home after repeated calls or are unavailable for some other reason.

February 2025 Supplement. In February 2025, in addition to the basic CPS questions, interviewers asked supplementary questions about participation in artistic activities of each eligible CPS respondent and spouse (if applicable) as well as another randomly selected eligible household member and their spouse (if applicable). The supplement was fielded in about one-half of the sampled CPS households, identified in the Month-in-Sample (MIS) groups 2, 3, 6, and 7. Sample persons in the MIS groups 2 and 6 received a different questionnaire from sample persons in the MIS groups 3 and 7. Only civilians aged 18 years or older were eligible for the supplement.

Current Population Survey Estimation Procedure. This survey's estimation procedure adjusts weighted sample results to agree with independently derived population controls of the civilian noninstitutionalized population of the United States, each state, and the District of Columbia. These population controls[5] are prepared monthly as part of the Census Bureau's Population Estimates Program.

The population controls for the nation are distributed by demographic characteristics in two ways:

- Age, sex, and race (White alone, Black alone, and all other groups combined).
- Age, sex, and Hispanic origin.

The population controls for the states are distributed by:

- Race (Black alone and all other race groups combined).
- Age (0-15, 16-44, and 45 and over).
- Sex.

The independent estimates by age, sex, race, and Hispanic origin, and for states by selected age groups and broad race categories, are developed using the basic demographic accounting formula whereby the population from the 2020 Census data[6] is updated using

---

3 For further information on CATI and CAPI and the eligibility criteria, please see U.S. Census Bureau (2019).

4 Counts and estimates throughout this source and accuracy statement are rounded according to Disclosure Review Board rounding rules.

5 For additional information on population controls, including details on the demographic characteristics used and net international components, please see Chapters 1-3 and Appendix: History of the Current Population Survey of U.S. Census Bureau (2019).

6 In recent decades, the decennial census has usually provided all the data necessary to produce the population base used in the population controls. However, changes in disclosure avoidance practices and delays in the 2020 Census necessitated changes to the data sources that produce the base population for

data on the components of population change (births, deaths, and net international migration) with net internal migration as an additional component in the state population controls.

The net international migration component of the population controls includes:

- Net international migration of the foreign born;
- Net migration between the United States and Puerto Rico;
- Net migration of natives to and from the United States; and
- Net movement of the Armed Forces population to and from the United States.

Because the latest available information on these components lags behind the survey date, it is necessary to make short-term projections of these components to develop the estimate for the survey date.

Arts Benchmark Survey Estimation Procedure. The Arts Benchmark Survey adjusts weighted sample results to agree with the same independently derived population estimates of the civilian noninstitutionalized population of the United States as the CPS. However, the age groups were modified to include only those who are 18 years or older. For 2025, the two MIS-pair samples were weighted separately so that each pair is weighted to represent the full population.

ACCURACY OF THE ESTIMATES

A sample survey estimate has two types of error: sampling and nonsampling. The accuracy of an estimate depends on both types of error. The nature of the sampling error is known given the survey design; the full extent of the nonsampling error is unknown.

Sampling Error. Since the CPS estimates come from a sample, they may differ from figures from an enumeration of the entire population using the same questionnaires, instructions, and enumerators. For a given estimator, the difference between an estimate based on a sample and the estimate that would result if the sample were to include the entire population is known as sampling error. Standard errors, as calculated by methods described in "Standard Errors and Their Use," are primarily measures of the magnitude of sampling error. However, the estimation of standard errors may include some nonsampling error.

Nonsampling Error. For a given estimator, the difference between the estimate that would result if the sample were to include the entire population and the true population value being estimated is known as nonsampling error. There are several sources of nonsampling error that may occur during the development or execution of the survey. It can occur because of circumstances created by the interviewer, the respondent, the survey

---

the Vintage 2025 population estimates. The updated population controls use a Blended Base that draws on the 2020 Census, 2020 Demographic Analysis Estimates, and Vintage 2020 Postcensal Population Estimates. More information on this methodology can be found at U.S. Census Bureau (2026).

instrument, or the way the data are collected and processed. Some nonsampling errors, and examples of each, include:

- Measurement error: The interviewer records the wrong answer, the respondent provides incorrect information, the respondent estimates the requested information, or an unclear survey question is misunderstood by the respondent.
- Coverage error: Some individuals who should have been included in the survey frame were missed.
- Nonresponse error: Responses are not collected from all those in the sample or the respondent is unwilling to provide information.
- Imputation error: Values are estimated imprecisely for missing data.
- Processing error: Forms may be lost, data may be incorrectly keyed, coded, or recoded, etc.

To minimize these errors, the Census Bureau applies quality control procedures during all stages of the production process including the design of the survey, the wording of questions, the review of the work of interviewers and coders, and the statistical review of reports.

Two types of nonsampling error that can be examined to a limited extent are nonresponse and undercoverage.

Nonresponse. The effect of nonresponse cannot be measured directly, but one indication of its potential effect is the nonresponse rate. For the February 2025 basic CPS, the household-level unweighted nonresponse rate was 31.3 percent. The person-level unweighted nonresponse rate for the Arts Benchmark Survey was an additional 11.4 percent.

Since the basic CPS nonresponse rate is a household-level rate and the Arts Benchmark Survey nonresponse rate is a person-level rate, we cannot combine these rates to derive an overall nonresponse rate. Nonresponding households may have fewer persons than interviewed ones, so combining these rates may lead to an overestimate of the true overall nonresponse rate for persons for the Arts Benchmark Survey.

Responses are made up of complete interviews and sufficient partial interviews. A sufficient partial interview is an incomplete interview in which the household or person answered enough of the questionnaire for the supplement sponsor to consider the interview complete. The remaining supplement questions may have been edited or imputed to fill in missing values. Insufficient partial interviews are considered to be nonrespondents. Refer to the supplement overview attachment in the technical documentation for the specific questions deemed critical by the sponsor as necessary to answer in order to be considered a sufficient partial interview.

As a result of sufficient partial interviews being considered responses, individual items/questions have their own response and refusal rates. As part of the nonsampling error analysis, the item response rates, item refusal rates, and edits are reviewed. For the

Arts Benchmark Survey, the unweighted item refusal rates range from 0.0 percent to 0.7 percent. The unweighted item nonresponse rates range from 0.2 percent to 8.4 percent.

Undercoverage. The concept of coverage with a survey sampling process is defined as the extent to which the total population that could be selected for sample "covers" the survey's target population. Missed housing units and missed people within sample households create undercoverage in the CPS. Overall CPS undercoverage for February 2025 is estimated to be about ten percent. CPS coverage varies with age, sex, and race. Generally, coverage is higher for female than for male persons and higher for non-Black than for Black persons. This differential coverage is a general problem for most household-based surveys.

The CPS weighting procedure mitigates bias from undercoverage, but biases may still be present when people who are missed by the survey differ from those interviewed in ways other than age, race, sex, Hispanic origin, and state of residence. How this weighting procedure affects other variables in the survey is not precisely known. All of these considerations affect comparisons across different surveys or data sources.

A common measure of survey coverage is the coverage ratio, calculated as the estimated population before poststratification divided by the independent population control. Table 1 shows February 2025 CPS coverage ratios by age and sex for certain race and Hispanic groups. The CPS coverage ratios can exhibit some variability from month to month.

Table 1. Current Population Survey Coverage Ratios: February 2025

Age group	Total			White alone		Black alone		Residual race[A]		Hispanic[B]	
	All people	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
0-15	0.85	0.85	0.84	0.91	0.91	0.65	0.63	0.75	0.77	0.77	0.81
16-19	0.81	0.83	0.80	0.87	0.84	0.67	0.56	0.78	0.83	0.85	0.78
20-24	0.74	0.76	0.73	0.80	0.75	0.59	0.69	0.69	0.65	0.78	0.76
25-34	0.82	0.83	0.82	0.89	0.87	0.58	0.60	0.75	0.79	0.85	0.84
35-44	0.88	0.86	0.90	0.91	0.95	0.63	0.68	0.80	0.86	0.82	0.89
45-54	0.90	0.89	0.92	0.91	0.97	0.75	0.74	0.85	0.82	0.77	0.87
55-64	0.95	0.92	0.98	0.94	1.02	0.76	0.82	0.85	0.91	0.80	0.93

0+	0.90	0.89	0.91	0.94	0.96	0.70	0.72	0.80	0.82	0.82	0.85

Source: U.S. Census Bureau, Current Population Survey, February 2025, Project number: P-538354, Disclosure Review Board approval number: CBDRB-FY26-065.

A The Residual race group includes cases indicating a single race other than White or Black, and cases indicating two or more races.

B Hispanics may be any race.

Comparability of Data. Data obtained from the CPS and other sources are not entirely comparable. This is due to differences in interviewer training and experience and in

differing survey processes.[7] These differences are examples of nonsampling variability not reflected in the standard errors. Therefore, caution should be used when comparing results from different sources.

Data users should be careful when comparing the data from this microdata file, which reflects 2020 Census-based controls,[8] with microdata files which reflect 2010 Census-based controls. Ideally, the same population controls should be used when comparing any estimates. In reality, the use of the same population controls is not practical when comparing trend data over a period of 10 to 20 years. Thus, when it is necessary to combine or compare data based on different controls or different designs, data users should be aware that changes in weighting controls or weighting procedures can create small differences between estimates. The discussion following includes information on comparing estimates derived from different populations or different sample designs.

Microdata files from previous years reflect the latest available census-based controls. Although the most recent change in population controls had relatively little impact on summary measures such as averages, medians, and percentage distributions, it did have a significant impact on levels. For example, use of 2020 Census-based controls results in about a 0.7 percent increase from the 2010 Census-based controls in the civilian noninstitutionalized population. Thus, estimates of levels for data collected in 2022 and later years will differ from those for earlier years by more than what could be attributed to actual changes in the population. These differences could be disproportionately greater for certain population subgroups than for the total population.

Users should also exercise caution because of changes caused by the phase-in of the 2010 Census files (see "Basic CPS").[9] During this time period, CPS data were collected from sample designs based on different censuses. Two features of the new CPS design have the potential of affecting estimates: (1) the temporary disruption of the rotation pattern from August 2014 through June 2015 for a comparatively small portion of the sample and (2) the change in sample areas. Most of the known effect on estimates during and after the sample redesign will be the result of changing from 2000 to 2010 geographic definitions. Research has shown that the national-level estimates of the metropolitan and nonmetropolitan populations should not change appreciably because of the new sample design. However, users should still exercise caution when comparing metropolitan and nonmetropolitan estimates across years with a design change, especially at the state level.

Caution should also be used when comparing Hispanic estimates over time. No independent population control totals for people of Hispanic origin were used before 1985.

A Nonsampling Error Warning. Since the full extent of the nonsampling error is unknown, one should be particularly careful when interpreting results based on small

---

7 Survey processes include, but are not limited to, question wording, universe, sampling frame, interview modes, and weighting.

8 Refer to Footnote 6.

9 The phase-in process using the 2010 Census files began April 2014.

differences between estimates. The Census Bureau recommends that data users incorporate information about nonsampling errors into their analyses, as nonsampling error could impact the conclusions drawn from the results. Caution should also be used when interpreting results based on a relatively small number of cases. Summary measures (such as medians and percentage distributions) probably do not reveal useful information when computed on a subpopulation smaller than 75,000.

For additional information on nonsampling error, including the possible impact on CPS data, when known, refer to U.S. Census Bureau (2019) and Brooks & Bailar (1978).

Standard Errors and Their Use. A sample estimate and its standard error enable one to construct a confidence interval. A confidence interval is a range about a given estimate that has a specified probability of containing the average result of all possible samples. For example, if all possible samples were surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then approximately 90 percent of the intervals from 1.645 standard errors below the estimate to 1.645 standard errors above the estimate would include the average result of all possible samples.

A particular confidence interval may or may not contain the average estimate derived from all possible samples, but one can say with the specified confidence that the interval includes the average estimate calculated from all possible samples.

Standard errors may also be used to perform hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The most common type of hypothesis is that the population parameters are different. An example of this would be comparing the percentage of men who were part-time workers to the percentage of women who were part-time workers.

Tests may be performed at various levels of significance. A significance level is the probability of concluding that the characteristics are different when, in fact, they are the same. For example, to conclude that two characteristics are different at the 0.10 level of significance, the absolute value of the estimated difference between characteristics must be greater than or equal to 1.645 times the standard error of the difference.

The Census Bureau uses 90-percent confidence intervals and 0.10 levels of significance to determine statistical validity. Consult standard statistical textbooks for alternative criteria.

Estimating Standard Errors. The Census Bureau uses replication methods to estimate the standard errors of CPS Arts Benchmark Survey estimates. These methods primarily measure the magnitude of sampling error. However, they do measure some effects of nonsampling error as well. They do not measure systematic biases in the data associated with nonsampling error. Bias is the average over all possible samples of the differences between the sample estimates and the true value.

The Census Bureau recommends the use of replicate weights to estimate standard errors. This method balances accuracy with flexibility, providing capacity for high quality measures of variance for any estimate produced from complex survey data. In addition, the variation of replicates from year to year is a statistically sound method to estimate variation in the measurement of standard errors. Many statistical software packages have procedures that simplify the use of replicate weights for users.

For CPS supplement data released prior to 2026 and basic CPS data, generalized variance function (GVF) parameters have been calculated and used in the standard error illustrations of the source and accuracy statements. Information and parameters for basic CPS data can be found under "Reliability of estimates from the CPS" at Bureau of Labor Statistics (2025). Refer to U.S. Census (2020) for more information on using GVF parameters for prior supplement data. For the 2025 Arts Benchmark Survey illustrations in this source and accuracy statement, standard errors are calculated using replicate weights to promote increased accuracy.

Replicate Weighting. For most CPS supplements, the Census Bureau releases replicate weight files along with the supplement microdata files. The public use replicate weight files for the 2025 Arts Benchmark Survey can be matched to the microdata files to estimate standard errors.

The recommended successive difference replicate (SDR) method uses the 160 replicate weights independently to create 160 versions of each estimate. The replicate weights are called PWABSWGT1 through PWABSWGT160.[10] Note that these weights are used solely for calculating uncertainty. They should never be used to calculate an estimate. The full weight, PWABSWGT, should be used to calculate weighted estimates.

When employing SDR, data users should follow Fay's modified balanced repeated replication (BRR) method for estimating variances. Fay's method uses one factor, k, which is in the range (0, 1) and another factor equal to 2 – k. In Fay's method, the introduction of the perturbation factor (1 – k) allows the use of both halves of the sample, unlike the basic BRR method. Thus, Fay's method has the advantage that no subset of the sample units in a particular classification will be totally excluded.

Apply these replicate estimates in Formula (1) below to calculate the total variance for the item of interest, such as a point estimate, ratio of domain means, regression coefficient, or log-odds ratio, using the weight for the full sample and the replicate estimates of the same statistic using the replicate weights.

Calculate variance estimates for the estimates using:

$$\text{var}(\hat{\theta}_0) = \frac{1}{G(1-k)^2}\sum_{i=1}^{160}(\hat{\theta}_i - \hat{\theta}_0)^2 \qquad (1)$$

[10] For CPS supplements, divide public use weighting variables by 10,000 to achieve the appropriate order of magnitude for point estimates.

where:

G = number of replicates
1 - k = perturbation factor
$\hat{\theta}_i$ = i^{th} estimate of the parameter θ based on the observations included in the i^{th} replicate
$\hat{\theta}_0$ = survey estimate of the parameter θ based on the full sample

Formula (2) shows Fay's variance estimation formula used for CPS supplement estimates calculated with 160 replicates and k = 0.5:

$$\text{var}(\hat{\theta}_0) = \frac{4}{160}\sum_{i=1}^{160}(\hat{\theta}_i - \hat{\theta}_0)^2 \quad (2)$$

The standard error is the square root of the variance found in Formula (1) or (2):

$$s(\hat{\theta}_0) = \sqrt{\text{var}(\hat{\theta}_0)} \quad (3)$$

Refer to U.S. Census Bureau (2012 and 2018) for further guidance and sample code for using replicate weights to produce estimates of statistical variance for CPS supplements.

The following illustrations demonstrate how to perform analysis of 2025 CPS Arts Benchmark Survey estimates using standard errors calculated with replicate weights and Formulas (2) and (3).

Calculating Standard Errors and Confidence Intervals of Estimated Numbers. The approximate standard error, s_x, of an estimated number from the CPS Arts Benchmark Survey microdata file can be obtained by using replicate weights and Formulas (2) and (3).

Illustration 1
In February 2025, an estimated 24,770,000 people aged 18 and older reported playing a musical instrument. Use the replicate weights and Formulas (2) and (3) to calculate the standard error of adults who played a musical instrument, and then find the confidence interval, as shown in Table 2.

Table 2. Illustration of Standard Error and Confidence Interval of Estimated Numbers

Number of adults who played a musical instrument (x)	24,770,000
Standard error	840,500
90-percent confidence interval	23,390,000 to 26,150,000

Source: U.S. Census Bureau, Current Population Survey, Arts Benchmark Survey, February 2025, public use microdata files, Project number: P-538354, Disclosure Review Board approval number: CBDRB-FY26-065.

Note: The total number of people age 18 and over who played a musical instrument is selected by the following variable values: HRINTSTA = 1 (interview), PRTAGE ≥ 18 (age 18 and over), PRPERTYP = 2 (adult civilian household member), HRMIS = 3 or 7 (month-in-sample 3 or 7), and (PEA4A = 1 or

PEA4B = 1) (played a musical instrument). The supplement weight is PWABSWGT/10,000. The estimates in this illustration are rounded to at most four significant digits.

The 90-percent confidence interval is calculated as 24,770,000 ± 1.645 × 840,500.

Concluding that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all possible samples.

Select Standard Error Formulas for Ratios and Differences. While replicate methods yield more precise estimates of uncertainty for any point of interest, including percentages or ratios and differences, data users can also apply the following formulas to a given set of estimates and standard errors. Doing so may be useful when microdata analysis with replicate weights is not feasible and pre-existing estimates, such as published data products, are available. The following illustrations provide both further examples of estimated numbers with replicate-weight-based standard errors as inputs and calculations with those estimates making use of select standard error formulas.

Standard Errors of Estimated Percentages or Ratios. The reliability of an estimated percentage, computed using sample data for both the numerator and denominator, depends on the standard errors of both components.[11]

If the denominator, or base, is a population control, the formula can be simplified.[12] Formula (4) can be used when the base of the percentage is a population control, and Formula (5) can be used for all percentage and ratio estimates.

The approximate standard error, $s_{x/y}$, of an estimated percentage where the base is a population control can be obtained by using the formula:

$$s_{x/y} = \frac{s_x}{y} \tag{4}$$

Here s_x is the standard error of the numerator found using Formulas (2) and (3), and y is the population control in the denominator of the percentage.

For all other percentages and ratios, compute the standard error of the ratio using the formula:

$$s_{x/y} = \frac{x}{y}\sqrt{\left(\frac{s_x}{x}\right)^2 + \left(\frac{s_y}{y}\right)^2} \tag{5}$$

The standard error of the numerator, s_x, and denominator, s_y, may be calculated using Formulas (2) and (3). This will result in accurate estimates of the standard error of the

[11] Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more.

[12] For more information on population controls, reference the earlier sections: "Current Population Survey Estimation Procedure" and "Arts Benchmark Survey Estimation Procedure."

same characteristic in two different areas or for the ratio between separate and uncorrelated characteristics in the same area. However, if there is a high positive (negative) correlation between the two characteristics, the formula will overestimate (underestimate) the true standard error.

For estimates expressed as the ratio of *x* per 100 *y* or *x* per 1,000 *y*, multiply Formula (5) by 100 or 1,000, respectively, to obtain the standard error.

Illustration 2

In February 2025, an estimated 263,900,000 people aged 18 and older, and 14,620,000 or 5.54 percent, indicated that they did leatherwork, metalwork, or woodwork. Since the denominator in this percentage is treated as a CPS Arts Benchmark Survey population control, use the replicate weights and Formulas (2), (3), and (4) to calculate the standard error of the percentage of adults who did any leatherwork, metalwork, or woodwork. Then find the confidence interval, as shown in Table 3.

Table 3. Illustration of Standard Errors of Estimated Population Control Percentages

Number of adults who did any leatherwork, metalwork, or woodwork (x)	14,620,000
Total number of adults (y)	263,900,000
Percentage of adults who did any leatherwork, metalwork, or woodwork (x/y)	5.54
Standard error of x (s_x)	612,200
Standard error of x/y ($s_{x/y}$)	0.23
90-percent confidence interval	5.16 to 5.92

Source: U.S. Census Bureau, Current Population Survey, Arts Benchmark Survey, February 2025, public use microdata files, Project number: P-538354, Disclosure Review Board approval number: CBDRB-FY26-065.

Note: The total number of adults is selected by the following variable values: HRINTSTA = 1 (interview), PRTAGE ≥ 18 (age 18 or older), PRPERTYP = 2 (adult civilian household member), HRMIS = 3 or 7 (month-in-sample 3 or 7). People who did any leatherwork, metalwork, or woodwork are identified by (PEA2A = 1 or PEA2B = 1) (leatherwork, metalwork, or woodwork). The supplement weight is PWABSWGT/10,000. The estimates in this illustration are rounded to at most four significant digits.

The standard error is calculated as

$$s_{x/y} = \frac{612{,}200}{263{,}900{,}000} = 0.0023 = 0.23\%$$

and the 90-percent confidence interval for the estimated percentage of people aged 18 years old or older who did leatherwork, metalwork, or woodwork is from 5.16 to 5.92 percent (i.e., 5.54 ± 1.645 × 0.23).

Illustration 3

In February 2025, the estimated ratio of men to women who did leatherwork, metalwork, or woodwork was 11,300,000 to 3,317,000, or 3.407. As shown in Table 4, use replicate weights and formulas (2) and (3) to recreate *x* and *y* and their standard errors, and use Formula (5) to estimate the standard error and confidence interval for the ratio.

Table 4. Illustration of Standard Errors of Ratios

	Men (x)	Women (y)	Ratio (x/y)
Number who did leatherwork, metalwork, or woodwork	11,300,000	3,317,000	3.407
Standard error	503,700	263,500	0.3103
90-percent confidence interval	10,470,000 to 12,130,000	2,884,000 to 3,750,000	2.897 to 3.917

Source: U.S. Census Bureau, Current Population Survey, Arts Benchmark Survey, February 2025, public use microdata files, Project number: P-538354, Disclosure Review Board approval number: CBDRB-FY26-065.

Note: The total number of men age 18 and over who did any leatherwork, metalwork, or woodwork is selected by the following variable values: HRINTSTA = 1, PESEX = 1, PRTAGE ≥ 18, PRPERTYP = 2, HRMIS = 3 or 7, and (PEA2A = 1 or PEA2B = 1). The total number of women age 18 and over who did any leatherwork, metalwork, or woodwork is selected by the following variable values: HRINTSTA = 1, PESEX = 2, PRTAGE ≥ 18, PRPERTYP = 2, HRMIS = 3 or 7, and (PEA2A = 1 or PEA2B = 1). The supplement weight is PWABSWGT/10,000. The estimates in this illustration are rounded to at most four significant digits.

The standard error is calculated as

$$s_{x/y} = \frac{11{,}300{,}000}{3{,}317{,}000}\sqrt{\left(\frac{503{,}700}{11{,}300{,}000}\right)^2 + \left(\frac{263{,}500}{3{,}317{,}000}\right)^2} = 0.3103$$

and the 90-percent confidence interval is calculated as 3.407 ± 1.645 × 0.3103.

Standard Errors of Estimated Differences. The standard error of the difference between two sample estimates is approximately equal to

$$s_{x_1-x_2} = \sqrt{\left(s_{x_1}\right)^2 + \left(s_{x_2}\right)^2} \qquad (6)$$

where s_{x_1} and s_{x_2} are the standard errors of the estimates, x_1 and x_2. The estimates can be numbers, percentages, ratios, etc. This will result in accurate estimates of the standard error of the same characteristic in two different areas or for the difference between separate and uncorrelated characteristics in the same area. However, if there is a high positive (negative) correlation between the two characteristics, the formula will overestimate (underestimate) the true standard error.

Illustration 4

In February 2025, of the estimated 24,770,000 people aged 18 and older who played a musical instrument, 16.48 percent had a high school diploma but no college. In addition, of the 24,770,000 people aged 18 and older who played a musical instrument, 52.08 percent had a bachelor's degree. As shown in Table 5, use replicate weights and Formulas (2) and (3) to recreate *x* and *y* and their standard errors, and use Formula (6) to estimate the standard error and confidence interval of the difference.

Table 5. Illustration of Standard Errors of Estimated Differences

	High school diploma (x_1/y_1)	Bachelor's degree (x_2/y_2)	Difference ($x_1/y_1 - x_2/y_2$)
Percentage who played a musical instrument (x/y)	16.48	52.08	35.60
Standard error	1.466	2.834	3.191
90-percent confidence interval	14.07 to 18.89	47.42 to 56.74	30.35 to 40.85

Source: U.S. Census Bureau, Current Population Survey, Arts Benchmark Survey, February 2025, public use microdata files, Project number: P-538354, Disclosure Review Board approval number: CBDRB-FY26-065.

Note: The total number of people age 18 and over who played a musical instrument is selected by the following variable values: HRINTSTA = 1 (interview), PRTAGE ≥ 18 (age 18 or older), PRPERTYP = 2 (adult civilian household member), HRMIS = 3 or 7 (month-in-sample 3 or 7), and (PEA4A = 1 or PEA4B = 1) (played a musical instrument). High school graduates with no college are identified by PEEDUCA = 39 (high school diploma). Those with at least a bachelor's degree are identified by PEEDUCA = (43, 44, 45 or 46) (bachelor's degree or higher). The supplement weight is PWABSWGT/10,000. The estimates in this illustration are rounded to at most four significant digits.

The standard error of the difference is calculated as

$$s_{x_1/y_1 - x_2/y_2} = \sqrt{1.466^2 + 2.834^2} = 3.191$$

and the 90-percent confidence interval around the difference is calculated as 35.60 ± 1.645 × 3.191. Since this interval does not include zero, we can conclude with 90-percent confidence that the percentage of adults who played a musical instrument and have a bachelor's degree is greater than the percentage of adults who played a musical instrument and have a high school diploma with no college.
