BIBLIOGRAPHIC CITATION, ACKNOWLEDGMENT OF ASSISTANCE
AND DATA DISCLAIMER

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. In order to get such source acknowledgment listed in social science bibliographic utilities, it is necessary to present them in the form of a footnote. The bibliographic citation for this data collection is:

file]. Washington, DC: U.S. Dept. of Commerce,
Bureau of the Census [producer], 1982. Ann Arbor,
MI: Inter-university Consortium for Political and
Social Research [distributor], 1990.

The ICPSR Council also urges all users of ICPSR data to follow some adaptation of the following assistance/disclaimer statement, with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this
(publication) were made available (in part) by the
Inter-university Consortium for Political and
Social Research. The data for CURRENT POPULATION
SURVEY, JUNE 1976 were originally collected and
prepared by the U.S. Dept. of Commerce, Bureau
of the Census. Neither the collector of the
original data nor the Consortium bears any
responsibility for the analyses or interpretations
presented here.

In order to provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of ICPSR data resources is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

DATA COLLECTION DESCRIPTION

United States Department of Commerce. Bureau of the Census
CURRENT POPULATION SURVEY, JUNE 1976 (ICPSR 9282)

SUMMARY: This survey gathered information on labor force activity, fertility, birth expectations, and other personal characteristics including age, sex, race, marital status, family income, type of dwelling unit, veteran status, relationship to the head of the household, education, and Spanish origin. The following labor force characteristics of employed persons are reported for the week immediately preceding the survey: occupation, industry, total number of hours worked, overtime hours worked, reasons for working less than 35 hours, reasons causing temporary absence from work, the number of work hours missed because of temporary absence, and whether or not wages or salary were received for the hours missed. Labor force characteristics of unemployed persons include the date, occupation, and industry of the job last held, methods used to search for a job during the last four weeks, reasons why a job was sought, the number of weeks spent looking for a job, and whether a full-time or a part-time job was sought. Work-related information on persons not in the labor force includes reasons for not looking for work, reasons for leaving the last job, length of time since a job was last sought, whether or not a job was desired at the time of the survey, and whether or not the individual intended to seek a job during the next 12 months. Questions on birth expectations asked married but not separated women 14 to 39 years old and widowed, divorced, separated, or never married women 18 to 34 years old how many more children they expected to have during their lifetime and within the next five years. The survey also collected the following information on never married females ages 18 to 59 and ever married females ages 14 to 59: year and month of first marriage, number of children ever born, month and year in which the most recent child was born, number of children ever born less than five years of age, and the number of own children living in the household. CLASS IV

UNIVERSE: Noninstitutionalized civilians ages 14 and over residing in households within the United States.

SAMPLING: Area probability sample of households.

NOTE: The data contain alphabetic and other nonnumeric codes.

EXTENT OF COLLECTION: 1 data file

DATA FORMAT: Logical Record Length

File Structure: rectangular

Cases: 109,173

Variables: approx. 211

Record Length: 480

Records Per Case: 1

Current Population Survey Non-March Record Layouts

In the record layout, location of data is indicated by character position within a word. Each word signifies six character positions on the tape. To determine the location of specific data, calculate the number of positions allocated for all previous words; then, to that figure, add the character location (1-6) specified within the designated word. For example, data for major activity last week (Attachment 3, page 12) corresponds to word 9, character 1. Multiplying the number of previous words by the number of character positions per word equals 48 positions allocated for data. Thus, the first character of word 9 is located in position 49.

8	Number of previous words
x 6	Number of character positions per word
<hr/> 48	Number of positions allocated for data
+ 1	Character position within designated word
<hr/> 49	Location of data for word 9, character 1

To determine the location of data reflecting the reason a respondent works less than 35 hours a week (word 9, characters 5-6), repeat the above calculations except substitute a "5" (noting character position within word) in place of the "1". Calculations show that this item occupies character positions 53 and 54.

Record layouts are similar for both interviewed and noninterviewed households. Geographic data are provided for both types of records, but employment figures are furnished only for interviewed households. For noninterviewed households, these corresponding character positions are blank or padded. However, in character positions 37 and 38, interview records show data for item 20, whether the household member worked last week, and range of hours worked; noninterview Type A records show race of head and reason for noninterview; noninterview Types B and C records show reason for noninterview.

FOR PUBLIC USE FILES (OPTION I) JANUARY 1973 TO JAN 77
