Acknowledgement of Assistance

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR Data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for CURRENT POPULATION SURVEY, JUNE 1979 were originally collected by the U.S. Dept. of Commerce. Bureau of the Census. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

U.S. Dept. of Commerce. Bureau of the Census;
CURRENT POPULATION SURVEY, JUNE 1979 (ICPSR 8349)

Data from this collection are provided as a source of official government statistics on labor force activity for the week prior to the survey. Comprehensive data are available on the employment status, occupation, and industry of persons 14 years old and over. Demographic characteristics such as age, sex, race, marital status, veteran status, household relationship, educational background, and Spanish origin are included. Additional questions were asked of women 14-59 years of age to obtain information on their birth history and birth expectations. Data for this supplemental group include the total number of children born, date of birth of the first and the most recent child, and date of first marriage. Women 18-34 years of age also were asked the number of additional children they expect to have, and the number they expect to have within the next five years. Data shown for husbands include such items as age, race, education, employment status, and occupation. Total family income is also provided.

The universe consists of all persons in the civilian noninstitutional population of the United States living in households. The probability sample selected consists of approximately 76,700 households. The collection consists of one rectangular data file containing 160,921 records and approximately 250 variables. The logical record length of the file is 600 characters. Class IV

Abstract

Current Population Survey, June 1979
[machine-readable data file] / conducted
by the Bureau of the Census for the Bureau
of Labor Statistics. Revised edition. --
Washington: Bureau of the Census [producer
and distributor], 1982.

TYPE OF FILE:

Microdata; unit of observation is individuals within housing units.

UNIVERSE DESCRIPTION:

The universe consists of all persons in the civilian noninstitutional population of the United States living in households. The probability sample selected to represent the universe consists of approximately 76,700 households.

SUBJECT-MATTER DESCRIPTION:

Data are provided on labor force activity for the week prior to the survey. Comprehensive data are available on the employment status, occupation, and industry of persons 14 years old and over. Also shown are personal characteristics such as age, sex, race, marital status, veteran status, household relationship, educational background, and Spanish origin.

Supplemental statistics are shown on birth history and birth expectations. Data for women 14-59 years of age include the total number of children ever born, date of birth of the first and the most recent child, and date of first marriage. Currently married women 14-17 years of age and all women 18-34 years of age were asked the number of additional children they expect to have, and the number they expect to have within the next five years. Data shown for husbands include such items as age, race, education, employment status, and occupation. Total family income is also provided. There are coding changes in the supplement on the revised edition of the documentation.

GEOGRAPHIC COVERAGE:

All States and 44 SMSA's are identified and ranked by population size (1970). Central city/noncentral city indicators are provided for records in all identified SMSA's. For all other records, central city/noncentral city and nonSMSA indicators are provided except where suppression is required for confidentiality reasons.

TECHNICAL DESCRIPTION:

FILE STRUCTURE: Rectangular.

FILE SIZE: 160,921 logical records; 600 character logical record length.

FILE SORT SEQUENCE: State rank by SMSA rank by household identification number by line number.

REFERENCE MATERIALS:

"Current Population Survey, June 1979 Tape Technical Documentation (Revised Edition)" (this document). Documentation contains this abstract, a questionnaire facsimile, and record layouts of the file. One copy accompanies each file order. Additional copies are available for \$5 from Data User Services Division, Customer Services (Tapes), Bureau of the Census, Washington, D.C. 20233.

Bureau of the Census. The Current Population Survey: Design and Methodology (Technical Paper 40). Describes in detail the sample design and survey procedures used as well as accuracy of estimates and sampling errors. Available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. GPO Stock No. 003-024-01490-4. Price: \$5.50.

RELATED PRINTED REPORTS:

Bureau of Labor Statistics. Employment and Earnings, July 1979. The employment information in Section A of this publication is derived from the Current Population Survey, June 1979. Copies are available at Government Printing Office Depository Libraries or inquiries may be directed to the Department of Labor, Bureau of Labor Statistics, Washington, D.C. 20212.

FILE AVAILABILITY:

The file may be ordered from Data User Services Division using the Customer Services order form on the following page. When ordering, please refer to file number Cu CPS 79 006. The following technical options are available at a cost of \$140 per reel.

	<u>Reels</u>	<u>Cost</u>
9 channel, 1600 bpi (EBCDIC or ASCII)	3	\$420
9 channel, 6250 bpi (EBCDIC or ASCII)	1	\$140

ATTACHMENT 2

Current Population Survey Non-March Record Layouts

Attached are record layouts for the June 1979 Current Population Survey. Record layouts illustrating basic data collected each month comprise Attachment 3 for interviewed households, Attachment 4 for noninterviewed Type A households, and Attachment 5 for noninterviewed Type B or C households. (See items 14 and 15 on questionnaire for examples of each type.) Next follows the record layout for the supplemental data collected.

In the record layout, location of data is indicated by character position within a word. Each word signifies six character positions on the tape. To determine the location of specific data, calculate the number of positions allocated for all previous words; then, to that figure, add the character location (1-6) specified within the designated word. For example, data for major activity last week (Attachment 3, page 12) corresponds to word 9, character 1. Multiplying the number of previous words by the number of character positions per word equals 48 positions allocated for data. Thus, the first character of word 9 is located in position 49.

8	Number of previous words
x 6	Number of character positions per word
<hr/> 48	Number of positions allocated for data
+ 1	Character position within designated word
<hr/> 49	Location of data for word 9, character 1

To determine the location of data reflecting the reason a respondent works less than 35 hours a week (word 9, characters 5-6), repeat the above calculations except substitute a "5" (noting character position within word) in place of the "1". Calculations show that this item occupies character positions 53 and 54.

Record layouts are similar for both interviewed and noninterviewed households. Geographic data are provided for both types of records, but employment figures are furnished only for interviewed households. For noninterviewed households, these corresponding character positions are blank or padded. However, in character positions 37 and 38, interview records show data for item 20, whether the household member worked last week, and range of hours worked; noninterview Type A records show race of head and reason for noninterview; noninterview Types B and C records show reason for noninterview.
