#### Acknowledgement of Assistance

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR Data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for CURRENT POPULATION SURVEY, MAY 1981 were originally collected by the U.S. Dept. of Commerce, Bureau of the Census. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

U.S. Dept. of Commerce. Bureau of the Census;  
CURRENT POPULATION SURVEY, MAY 1981 (ICPSR 8153)

Each May the Current Population Survey covers labor force activity in the civilian non-institutionalized population of the U.S. A sample was taken of approximately 77,000 households and data were gathered for all inhabitants. Data are provided on the employment status, occupation, and industry of persons 14 years old and over. Demographic characteristics are also shown.

In addition, questions on multiple jobholding were asked of persons in a quarter of the sample households. Information includes number of hours and days worked each week, schedule, reason for working a second job, and whether on layoff from another job.

This particular CPS also has statistics on adult education participation by persons 16 years old and over. For each course taken, data are included on subject area, reason for taking the course, amount paid for the class, and source of payment.

This file has 170,954 records, each with a logical record length of 660. Class IV

Abstract

Current Population Survey, May 1981  
[machine-readable data file] / conducted by  
the Bureau of the Census for the Bureau of  
Labor Statistics. --Washington: Bureau of  
the Census [producer and distributor], 1982.

TYPE OF FILE:

Microdata; unit of observation is individuals within housing units.

UNIVERSE DESCRIPTION:

The universe consists of all persons in the civilian noninstitutional population of the United States living in sampled housing units. The probability sample selected to represent the universe consists of approximately 77,000 households. Persons age 14 years and over have an adult record; children age 0 to 13 have a child record.

SUBJECT-MATTER DESCRIPTION:

Data are provided on labor force activity for the week prior to the survey. Comprehensive data are available on the employment status, occupation, and industry of persons 14 years old and over. Also shown are personal characteristics such as age, sex, race, marital status, veteran status, household relationship, educational background, and Spanish origin.

Questions in the supplement on multiple jobholding were asked only of persons in one-fourth of the sample households. These questions covered items such as premium pay, number of days and hours per week usually worked, presence of shiftwork and flexitime schedules, time of day started and ended work, and union membership status. For dual jobholders, data provided include the reason for working at a second job, the number of hours worked at this job, and whether on layoff from this other job.

Additional statistics are available on adult education participation by persons 16 years old and over. Information about each course taken includes general subject area, main reason for taking the course, credit status, who provided the instruction, source of payment, and dollar amount paid by respondent or family.

GEOGRAPHIC COVERAGE:

All States and 44 SMSA's are identified and ranked by population size (1970). Central city/noncentral city indicators are provided for records in all identified SMSA's. For all other records, central city/noncentral city and nonSMSA indicators are provided except where suppression is required.

TECHNICAL DESCRIPTION:

FILE STRUCTURE: Rectangular.

FILE SIZE: 170,954 logical records; 660 character logical record length.

FILE SORT SEQUENCE: State rank by SMSA rank by household identification number by line number.

ATTACHMENT 2

Current Population Survey Non-March Record Layouts

Attached are record layouts for the May 1981 Current Population Survey. Record layouts illustrating basic data collected each month comprise Attachment 3 for interviewed households, Attachment 4 for noninterviewed Type A households, and Attachment 5 for noninterviewed Type B or C households. (See items 14 and 15 on questionnaire for examples of each type.) Next follows the record layouts for children and supplemental data collected.

In the record layout, location of data is indicated by character position within a word. Each word signifies six character positions on the tape. To determine the location of specific data, calculate the number of positions allocated for all previous words; then, to that figure, add the character location (1-6) Specified within the designated word. For example, data for major activity last week (Attachment 3, page 12) corresponds to word 9, character 1. Multiplying the number of previous words by the number of character positions per word equals 48 positions allocated for data. Thus, the first character of word 9 is located in position 49.

8	Number of previous words
x 6	Number of character positions per word
<hr/>	Number of positions allocated for data
+ 1	Character position within designated word
49	Location of data for word 9, character 1

To determine the location of data reflecting the reason a respondent works less than 35 hours a week (word 9, characters 5-6), repeat the above calculations except substitute a "5" (noting character position within word) in place of the "1". Calculations show that this item occupies character positions 53 and 54.

Record layouts are similar for both interviewed and noninterviewed households. Geographic data are provided for both types of records, but employment figures are furnished only for interviewed households. For noninterviewed households, these corresponding character positions are blank or padded. However, in character positions 43 and 44, interview records show data for item 20, whether the household member worked last week, and range of hours worked; noninterview Type A records show race of head and reason for noninterview; noninterview Types B and C records show reason for noninterview.
