**SUMMARY:** Data on labor force activity for the week prior to the survey are supplied in this collection. Information is available on the employment status, occupation, and industry of persons 14 years old and over. Demographic variables such as age, sex, race, marital status, veteran status, household relationship, educational background, and Spanish origin are included. In addition to providing these core data, the October CPS survey also contains a special supplement on school enrollment. This supplement includes the following items: current grade attending at public or private school, whether attending college full- or part-time at a two- or four-year institution, year last attended a regular school, and year graduated from high school. CLASS IV

**UNIVERSE:** All persons in the noninstitutional population of the United States.  
**SAMPLING:** Monthly probability sample based on a stratified sampling scheme. The sample consists of approximately 71,000 households.

## ABSTRACT

Current Population Survey, October 1978  
[machine-readable data file] / conducted  
by the Bureau of the Census for the Bureau  
of Labor Statistics. --Washington : Bureau  
of the Census [producer and distributor],  
1979.

TYPE OF FILE: Microdata; unit of observation is individuals  
within housing units.

UNIVERSE DESCRIPTION: The universe is the civilian non-  
institutional population living in housing units. Persons 14  
and over living in sampled housing units have an adult  
record. Children 3-13 have child records. A probability  
sample is used in selecting housing units.

SUBJECT-MATTER DESCRIPTION: The file provides data on labor  
force activity, employment status, occupation, and industry  
of persons 14 years and over. Characteristics such as age,  
sex, race, marital status, household relationship,  
educational background, and Spanish ethnicity are shown for  
each person 14 and over in the household enumerated.  
Education data are provided for adults and children.  
Information includes current school enrollment, type of  
school in which enrolled, and grade attending for all persons  
3 and older. Additional information for college students  
includes number of credit hours, major field of study,  
distance to school, and principal means of transportation to  
school.

GEOGRAPHIC COVERAGE: Individual States are identified and ranked  
by population size (1970). Forty-four SMSA's are identified  
and ranked by size in 1970. Within confidentiality  
guidelines, indicators are also provided for SMSA/non-SMSA  
and central city/non-central city.

### TECHNICAL DESCRIPTION:

FILE STRUCTURE: rectangular

FILE SIZE: 1 file; 162,116 records

FILE SORT SEQUENCE: State rank by SMSA rank by  
identification number by line number.

### CURRENT POPULATION SURVEY

#### Technical Documentation

Information concerning the Current Population Survey Basic data.

Part I of this technical documentation provides information about the basic file. The basic file contains the data obtained from questions asked each month in the Current Population Survey.

In some months, supplemental data are gathered concerning various items. When a file contains supplemental data, the information about that data is contained in a supplement to this technical documentation (PART II). For general information concerning supplemental data, see the overview section in Part I.

#### INTRODUCTION:

The Current Population Survey (CPS) is a household sample survey conducted monthly by the Bureau of the Census to provide estimates of employment, unemployment, and other characteristics of the general labor force, of the population as a whole, and of various subgroups of the population.

The CPS was initially designed primarily to reproduce timely estimates on a sample basis with measurable reliability for labor force data at the U.S. level each month. Although this summarizes the major objectives considered in designing the original sample program, the CPS is now used for purposes well beyond those originally envisioned. Expanding needs for additional current data by Government and other users have been met by adding additional questions to the monthly interview, in part by occasional supplementary inquiries. The survey covers the civilian noninstitutional population of the United States.

#### BASIC DATA:

The basic data is the information obtained each month from the survey. The record layout of the basic data is the same from January, 1968 to December, 1972. In January, 1973 a new layout was developed which continued through 1978. From January, 1973 through December, 1978 the basic data is in position 1-278 of the record.

### SUPPLEMENTAL DATA:

The information derived from the questions added to the basic question (ie questions after item 33) are called supplemental data. It continues from after position 278 until the end of the record. There is usually some fields of blanks or "filler" which separates the basic data from the supplemental data. The record size varies, depending upon which supplement it is. Specific information regarding the individual CPS file (comprised of both the basic data and the appropriate supplemental data) is available following this section.

## Overview of the Current Population Survey Program

The Current Population Survey (CPS) is a household sample survey conducted monthly by the Bureau of the Census since the 1940's. It provides estimates of employment, unemployment, and other characteristics of the general labor force, of the population as a whole, and of various subgroups of the population.

The CPS was initially designed primarily to produce monthly estimates on a sample basis for labor force data at the U.S. level. Although this summarizes the major objectives considered in designing the original sample program, the CPS is now used for purposes well beyond those originally envisioned. Expanding needs for additional current data by Government and other users have been met by occasional supplementary inquiries. The survey covers the civilian non-institutional population of the United States, 14 years old and over.

The CPS provides a large amount of detail not otherwise available on the economic status and activities of the population. It is the only source of monthly estimates of total employment, both farm and nonfarm; of nonfarm self-employed persons, domestics, and unpaid helpers in nonfarm family enterprises, as well as wage and salaried employees; and of the total unemployment, whether or not covered by unemployment insurance. It is the only comprehensive source of information on the personal characteristics of the total population (both in and out of the labor force), such as age and sex, race, marital and family status, veteran status, educational background, and ethnic origin.

It provides the only available distributions of workers by the numbers of hours worked (as distinguished from aggregate or average hours for an industry), as well as being the only comprehensive current source of information on the occupations and industries of workers.

Information is available from the survey not only for persons currently in the labor force but also for those who are outside the labor force. The characteristics of such persons -- whether married women with or without young children, disabled persons, students, older retired workers, etc -- can be determined. Information on their current desire for work, their past work experience, and their intentions as to jobseeking are available from a subsample.

Data have been provided at the national level since the inception of the CPS. After a few years, data for the census regions were also provided. More recently, funds have become available permitting expansion of the sample to increase the reliability of

permitting expansion of the sample to increase the reliability of data for States and selected standard metropolitan statistical areas (SMSA's). To improve the reliability of estimates tabulated at levels below the census regions, some of the monthly estimates are cumulated for publication as quarterly and annual averages.

National estimates of the size, composition, and changes in composition of the labor force are published each month by the Bureau of Labor Statistics in Employment and Earnings. Estimates of the total and civilian labor force are produced in considerable detail at the national level, in most instances, by sex, race, and age. Unemployment rates are given, by marital status and relationship to the household head and by occupation and industry, duration of unemployment, whether seeking full- or part-time work, reason for unemployment, job search methods used, etc. Seasonally adjusted data are provided for many of these series. In addition, the CPS is the source of periodic studies of personal and family income, migration, educational attainment, and other demographic, social, and economic topics.

Reports from these studies are issued by the Bureau in their various publications series. The P-20 series is most frequently used for these publications. Several subsets of these estimates are published in less detail as annual averages for the larger SMSA's and for States.

Since 1968, the individual sample records from the CPS have been made available in the form of computer tape files for public use. These public use files contain all of the demographic and economic information for each interviewed person in every interviewed household in the survey, sufficient geographic information is removed, however, to insure the confidentiality of the respondent households. The following paragraphs outline the geographic levels and data available from these files.

## Supplemental Data

### Current Population Survey 1968-1972

Geographic areas identified are regions, divisions, 19 States and 19 SMSA's.

May Multiple Job Holding - (1969-1972) Survey to obtain information relating to incidence and characteristics of persons working at more than one job during survey week, and to determine whether wage and salary workers reporting more than 40 hours of work during the reference week received premium pay for their overtime hours and to measure the extent of usual overtime work.

Private Household Workers - (1971) Survey to provide wage and hour information about household workers employed by private families and household service business.

Adult Education Participants - (1969 and 1972) Survey to obtain information from persons 17 years old and over who had participated in some form of adult education during the past 12 months on type of activity, reasons for participation, sponsorship, method and place of institutions, length of schedule and actual participation, source of payment and type of credit received.

June Marriage and Child Spacing - (1971) Survey to obtain information concerning the marital history and child spacing patterns of persons who are 14 years old and over.

Children Ever Born - (1972) Single question to obtain number of children ever born asked of every married women 14-59 years of age.

September Immunization - (1969-1972) Survey to obtain data about the extent of protection against influenza, polio, diphtheria, whooping cough, tetanus, measles, and mumps.

October School Enrollment - (1968-1972) Survey to obtain information on school enrollment, labor force status of students, date last attended school, date of high school graduation, and characteristics of high school dropouts. Additional questions were asked in 1971 in living arrangements of college students and junior college enrollment. Data are provided for persons 3 to 34 years of age.

Recent College Graduates - (1971-1972) Survey to obtain information from 1970 or 1971 college graduation or work

experience since receiving degree, duration of unemployment, if any type of job, if employed.

November Voting - (1968, 1970, 1972) Survey to provide information on registration and voting with characteristics of voters, nonvoters who are registered to vote and those not registered to vote.

Ethnic Background and Literacy - (1969) Survey to obtain information on characteristics of different ethnic groups and on current and childhood languages.

December Farm Wage Workers - (1971, 1972) Survey to obtain information on total farmdays and wages, total nonfarm days and wages, chief activity and migratory status of hired farm workers.

#### Current Population Survey 1973-1976

Geographic areas identified as regions, divisions, 13 States and 34 SMSA's.

January Job Tenure and Occupational Mobility - (1973) Survey to obtain data on length of time with the present employer for employed persons 16 years of age or older.

Job Finding - (1973) Survey to obtain information about methods of looking for work, time spent on the job search, labor force status prior to present job, and various characteristics of the unemployment or job search period.

April Food Stamp Recipients (1974-1976) and August (1977) - Survey to obtain information on the number of households received food stamps and the value and amount of food stamps.

April Volunteer Work - (1974) Survey to obtain data on persons who did volunteer work, the type of work done, the number of hours spent doing volunteer work, and the reason persons began doing volunteer work.

Job Seeking Activities of the Unemployed - (1976) Survey to obtain information on the kind of jobs unemployed persons are seeking and the methods and intensity with which such persons are trying to find work. Data is collected on reasons for refusing any job offers during the last month of their current period of unemployment, most recent job lasting at least 2 consecutive weeks, highest paying job since January 1974 if it wasn't then most recent, and other

characteristics (job seeking problems, sources of income, etc.,) during their unemployment.

May Multiple Job Holding and Premium Pay (see May 1968-72)

Postsecondary School - (1974) Surveys to collect data on (a) persons recently enrolled in a post secondary school or course. It concerns such topics as time between high school graduation and start of first enrollment, type of school attended, courses taken, plans for continued enrollment, and financing of post secondary education, and (b) high school seniors and recent graduates not currently enrolled covering prior attendance or enrollment in post secondary school, type of school, reasons for not completing program, plans for future enrollment, expenses and sources of financing related to schooling.

Adult Education - (1975) Survey similar to 1969 and 1972 surveys concerning participation in adult education activities other than full time enrollment in post secondary institutions.

June Children Ever Born and Expectations of Children - (1973, 74,76) Survey to obtain information from women 14-59 years of age who have ever been married concerning total number of children, date of birth of most recent child, date of first marriage. Currently married women 14-40 years of age were asked if they expect to have more children and if so how many, and when they expect the next child to be born.

Marital and Birth History and Birth Expectations - (1975) see June 1971

July Survey of Languages - (1975) Information concerning place of birth, mother tongue, usual and other languages spoken.

September National Immunization Survey - (1974-1976) (see September 1968-1972).

October School Enrollment Survey - (1973-1976) (see October 1968-1972).

Post Secondary School Enrollment - (1973) Survey to characterize the population of college and business, technical and vocational students. Information includes place and type of post-secondary instruction, length of commitment to individual program, costs of financing the program, and financial and employment status of student.

November Voting Survey - (1974, 1976) (see November 1968-1972).

Private Household Worker Survey - (1974) (see May 1971).

December Farm Wage Workers - (1973-1976) (see December 1968-1972)

Current Population Survey 1977

The areas identified are regions, divisions, all States, and 44 SMSA's.

April and August Food - Stamp Reciprocity - Survey to obtain information on the number of households who purchased or received food stamps during the previous 15 months in April and the previous 7 months in August and the value and amount paid for food stamps in the most recent month. Data were also collected on household participation in the AFDC program and family for the past 12 months. August survey also obtains information for the 1976-1977 school year on the participants in a school lunch program.

May Multiple Job Holding, Premium Pay, and Job Search of the Employed - Survey to obtain information on the characteristics of multiple job holders and the incidence of premium rates of pay for "at work" wage and salary employees who worked more than 40 hours at one job. Also obtained was information on beginning and ending time of work, usual days and hours worked, weekly and hourly earnings, and labor union membership. Data were also gathered on job search activities of the employed, including the methods and reasons for the search.

June Birth Expectations, Fertility, and Child Care - Survey obtain information for married women 14-49 years old and unmarried women 18-49 years old regarding the total number of children ever born, the date of birth of first child and the date of birth of most recent child. Married women 14-44 and unmarried women 18-44 were asked if they expect to have more children, and if so, the number and expected year of birth of next child. Information on type of child care used was obtained from mothers with children less than 5 years old.

September National Immunization - Survey to obtain data on individuals 14 years and older as to the extent of their protection against various types of influenza and their incidence of diabetes and chronic heart, kidney, and lung conditions. Information regarding protection against various types of influenza and against measles, mumps, tetanus, etc, was obtained for persons under 14 years old.

Polio protection information was also obtained for individuals under 20.

October School Enrollment - Survey to provide information of regular school enrollment at various levels, junior or regular college attendance, and date of high school graduation.

December Farm Wage Workers - Survey to obtain information on total farm workdays and wages, non-farm workdays and wages, major activity during the year, and migratory status.

#### USE OF THIS :DATA BASE DICTIONARY:

This computer generated report documents the data contents and record layout for the Current Population Survey. This report is organized into 2 parts, one part containing a general textual description of the file, and one part containing a description of each data item in the file. The data item description contains several pieces of information for each data item as follows:

NAME:	An arbitrarily assigned 12 character label, it may be a mnemonic or a numeric value indicating the location of the variable on the survey questionnaire.
DESCRIPTIVE LABEL:	A 40 character label describing the data item
LENGTH:	The size in character, of the data item
BEGIN:	The location in the data record of the first character of the data item
MAXIMUM VALUE:	The highest value this data item may contain
MINIMUM VALUE:	The lowest value this data item may contain
DATA CATEGORY:	This field indicates whether the data item is a numeric item which can be meaningfully processed algebraically or if the item is a code item from which it would not be meaningful to summarize or derive percentages
IMPLIED DECIMAL PLACES:	This field indicates how many, if any, implied places the data item contains

## SAMPLING, ROTATION, MATCHING and GEOGRAPHIC LIMITATIONS

### SURVEY SPECIFICATIONS

The specifications characterizing the present version of the CPS national sample are summarized as follows:

1. The CPS is a probability sample. As a consequence of this specification, it is possible to estimate most of the components of the survey error from data produced by the sample.
2. The sample is designed primarily to produce estimates of the major components of the labor force, in general, estimated levels with minimum variance for a fixed cost.
3. The major statistics of interest to be produced by the CPS are labor force characteristics of the U.S. population. The problem of maximizing the reliability for a wide range of other demographic statistics and for other tabulation areas is recognized as an important although secondary requirement. The monthly survey covers the civilian noninstitutional population.
4. The sample is selected with probability controls to insure that sample areas are designated in each of the 50 States and in the District of Columbia. This requirement insures an additional geographic spread of the sample and facilitates understanding the validity of the sample by a wider range of users.

For a detailed technical explanation of the sampling, see Chapter II of the Current Population Survey: Design and Technology.

### ROTATION

A sample is divided into eight approximately equal parts or subsamples, each a probability sample of the population covered by the survey. Each of these subsamples is known as a rotation group.

Each new rotation group is included in the survey for 4 months, is excluded for 8 months, is returned for an additional 4 months, then is retired from the sample. Because of this feature, the plan is referred to as the 4-8-4 rotation. Chapter III of Current Population Survey: Design and Methodology presents detailed, in-depth information on the sample rotation.

## MATCHING

It is possible to match records across files because of the rotation scheme. The means of matching records is the scrambled ID number. However, the scrambling algorithm has undergone several changes, making it possible to match files only within the following groups:

- Group 1 - Jan, 1968 through Nov 1971
- Group 2 - Dec 1971 through Dec 1972
- Group 3 - Jan. 1973 - Dec. 1976
- Group 4 - Jan. 1977 - present

Correct matching of individuals across these groups is impossible.

It is also important to recognize that a match between monthly files will not produce the number of matches theoretically possible. (Figure III on page 23 of Current Population Survey: Design and Methodology has a chart which aids calculation of the proportion of records which match across files). Some potential matches cannot be made because an interview household may not be able to be interviewed at a later time on the rotation. Reasons for a non-interview include no one at home and housing unit temporarily vacant or respondent refused to be interviewed. Others reasons for non-interviews would include non-seasonal regular housing units that are vacant, units in sample which are temporarily occupied by persons with usual residence elsewhere, units unfit for occupancy, units under construction, units converted to temporary business or storage or unit occupied only by either members of the Armed Forces or by persons under 14. It is also possible that the household may have entirely different residents.

## GEOGRAPHIC LIMITATIONS

For calendar year 1973, estimates were published for 19 States for which it was determined the CPS national sample could meet the reliability requirement of providing estimates of the annual average number of the monthly unemployed with a coefficient of variation of 10 percent or less on the number of persons unemployed assuming an unemployment rate of 5 percent.

The 19 States having the largest population (and largest CPS national sample sizes) are

California	Massachusetts	Ohio
Florida	Michigan	Pennsylvania
Georgia	Minnesota	Texas

Illinois  
Indiana  
Maryland  
North Carolina

Missouri  
New Jersey  
New York

Virginia  
Washington  
Wisconsin

For calendar years 1974 and 1975, the national sample was used to provide estimates for 8 States in addition to the 19 States mentioned. The additional States were included partly because an improved estimation system was introduced and partly by adopting a revised reliability standard for the State estimates. With the revised estimation procedure, the CPS national sample in these 27 States is considered sufficient to meet the standard of providing estimated annual averages of the number of monthly unemployed with a coefficient of variation of 10 percent or less on the number of persons unemployed, assuming an unemployment rate of 6 (rather than 5) percent. These eight States are

Alabama  
Connecticut  
Kentucky

Louisiana  
Oklahoma  
Oregon

South Carolina  
Tennessee

For calendar years 1976 and later, annual averages are to be provided for the 50 States and the District of Columbia with the same reliability standard as given above for calendar year 1974 and 1975 estimates. For the 27 States, the estimates are based on the national sample, for the 23 remaining States and the District of Columbia, a supplementary sample is designated each month to bring the reliability to the required standard.

Chapter VI of Current Population Survey: Design and Methodology presents detailed information concerning use of CPS data for States and local areas.

## Glossary

### GEOGRAPHIC CONCEPTS

Geographic Division - An area composed of contiguous States, with Alaska and Hawaii also included in one of the divisions. (A state is one of the 51 major political units in the United States.) The nine geographic divisions have been largely unchanged for the presentation of summary statistics since the 1910 census.

There are four regions: Northeast, North Central, South and West. The nine geographic divisions and four regions are presented below:

#### NORTHEAST REGION

##### New England Division

Connecticut  
Maine  
Massachusetts  
New Hampshire  
Rhode Island  
Vermont

##### Middle Atlantic Division

New Jersey

Standard Metropolitan Statistical Areas (SMSA's) - The concept of an SMSA has been developed in order to present general purpose statistics. The geographic boundaries of SMSA's are drawn by the Office of Federal Statistical Policy and Standards, U.S. Department of Commerce, Washington, D.C., with the advice of representatives of the major Federal statistical agencies.

In 1970, there were 247 SMSA's in the United States. Generally speaking, an SMSA consists of a county or group of counties containing at least one city (or twin cities) having a population of 50,000 or more plus adjacent counties which are metropolitan in character and are economically and socially integrated with the central city. In New England, towns and cities rather than counties are the units used in defining SMSA's. The name of the central city or cities is used as the name of the SMSA. There is no limit to the number of adjacent counties included in the SMSA as long as they are integrated with the central city nor is an SMSA limited to a single State; boundaries may cross State lines, as in the case of the Washington, D.C. - Maryland - Virginia SMSA.

Central Cities (of an SMSA) - The largest city in an SMSA is always a central city. The names of one or two additional cities may be added to the SMSA title and identified as a central city on the basis of the following criteria issued by OMB:

1. The additional city or cities must have a population of one-third or more of that of the largest city and a minimum population of 25,000 or;
2. The additional city or cities must have at least 25,000 inhabitants.

## SUBJECT CONCEPTS

Age - Age classification is based on the age of the person at his/her last birthday.

Civilian Labor Force - See "Labor Force"

Class of Worker - Specifies "wage and salary workers" subdivided into private and government workers, "self-employed workers" and "unpaid family workers". Wage and salary workers receive wages, salary, commission, tips or pay in kind from a private employer or from a government unit. Self-employed persons are those who work for profit or fees in their own business, profession or trade, or operate a farm. Unpaid family workers are persons working without pay for 15 hours a week or more on a farm or in a business operated by a member of the household to whom they are related by blood or marriage. (See Industry, Occupation and Class of Worker).

Duration of Unemployment - Duration of unemployment represents the length of time (through the current survey week) during which persons classified as unemployed had been continuously looking for work. For persons on layoff, duration of unemployment represents the number of full weeks since the termination of their most recent employment. A period of 2 weeks or more during which a person was employed or ceased looking for work is considered to break the continuity of the present period of seeking work. Average duration is an arithmetic mean computed from a distribution by single weeks of unemployment.

Education - See "Years of School Completed"

Employed - See "Labor Force"

ESR (Employment Status Recode) - The classification of each civilian 14 years old and over according to his/her responses to the monthly (basic) labor force items in March.

Experienced Labor Force - All employed persons and all unemployed persons except those who never worked at a full time job lasting at least 2 consecutive weeks.

Full-time Labor Force - Persons working on full-time schedules, involuntarily working part-time (part-time for economic reasons) such as slack work or material shortage and unemployed persons seeking full-time jobs.

Full-time Schedule - Persons on full-time schedules include persons working 35 hours or more, persons who worked 1-34 hours for noneconomic reasons (e.g., illness) and usually work full-time, and persons "with a job but not at work" who usually work full-time.

Head of Household - One person in each household was designated as the "head". However, the number of head is not equal to the number of households because only civilians are interviewed. The head of a household is usually the person regarded as the head by members of the household. Women are not classified as heads if their husbands are resident members of the household at the time of the survey. head's household and are not classified as separate households.

Head With No Other Relatives in Household - A household head who has no relatives living in the household. This would be the entry for a person living alone. Another example would be the designated head of an apartment shared by two or more unrelated persons.

Head With Other Relatives (including wife) in Household - The person designated as head of the household if he has one or more relatives (including his wife) living in the household.

Highest Grade of School Attended - See "Years of School Attended".

Hours of Work - Hours of work statistics relate to the actual member of hours worked during the survey week. For example, a person who normally works 40 hours a week but who was off on the Veterans Day holiday would be reported as working 32 hours even though he was paid for the holiday.

For persons working in more than one job, the figures relate to the number of hours worked in all jobs during the week. However, all the hours are credited to the major job.

Household - A household consists of all the persons who occupy a house, an apartment, or other group of rooms, or a room, which constitutes a housing unit. A group of rooms or a single room is regarded as a housing unit when it is occupied as a separate living quarters; that is, when the occupants do not live and eat with any other person in the structure, and when there is either (1) direct access from the outside or through a common hall, or

(2) a kitchen or cooking equipment for the exclusive use of the occupants.

Industry, Occupation, and Class of Worker - Industry, occupation, and class of worker (I & O) always apply to the same job. For the employed, current job is the job held in the reference week (the week before the survey). Persons with two or more jobs are classified in the job at which they worked the most hours during the reference week. The unemployed are classified according to their latest full-time civilian job lasting 2 or more weeks or by the job (either full or part-time) from which they were laid off. The I & O questions are also asked of persons not in the labor force who are in the 4th and 8th month in sample and who had worked in the last 5 years. The occupation/industry classification system for the 1970 Census of Population has been used to code March CPS data since 1971.

Jobseekers - All unemployed persons who made specific efforts to find a job sometime during the 4-week period preceding the survey week.

Keeping House - Engaged in own housework.

Labor Force - Persons are classified as in the labor force if they were employed, unemployed, or in the Armed Forces during the survey week. The "civilian labor force" includes all civilians classified as employed or unemployed. The file includes labor force data for civilians age 14 and over. However, the official definition of the civilian labor force is age 16 and over.

1. Employed - Employed persons comprise (1) all civilians who, during the survey week, did any work at all as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a farm in a business operated by a member of the family, and (2) all those who were not working but who had jobs because of illness, bad weather, vacation, or Labor-Management dispute, or because they were taking time off for personal reasons, whether or not they were seeking other jobs. These persons would have an Employment Status Recode (ESR) of one or two respectively in character 12 of the person record which designates "at work" and "with a job, but not at work". Each employed person is counted only once. Those persons who held more than one job are counted in the job at which they worked the greatest number of hours during the survey

week. If they worked an equal number of hours at more than one job, they would be counted at the job they held the longest.

2. Unemployed persons are those civilians who, during the survey week, had no employment but were available for work and (1) had engaged in any specific job seeking activity within the past 4 weeks, such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (2) were waiting to be called back to a job from which they had been laid off; or (3) were waiting to report to a new wage or salary job within 30 days. These persons would have an ESR Code of three in character 12 of the person record. The unemployed includes job leavers, job losers, new job entrant, and job reentrants.
  - a. Job Leavers - are persons who quit or otherwise terminated their employment voluntarily and immediately began looking for work.
  - b. Job Losers - are persons whose employments ended involuntarily who immediately began looking for work and those persons already on layoff.
  - c. New Job Entrants - are persons who never worked at a full-time job lasting 2 weeks or longer.
  - d. Job Reentrants - are persons who previously worked at a full-time job lasting 2 weeks or longer but were out of the labor force prior to beginning to look for work.
3. Not in Labor Force - This includes all civilians 14 years and over who are not classified as employed or unemployed. These persons are further classified as "engaged in own home housework", "in school", "unable to work" because of long-term physical or mental illness, and "other". The "other" group includes for the most part retired persons, those reported as too old to work, the voluntarily

idle, and seasonal workers for whom the survey week is an "off" season and who were not reported as unemployed. Persons doing only incidental unpaid family work (less than 15 hours) are also classified as not in the labor force.

For persons not in the labor force, data on previous work experience, intentions to seek work again, desire for a job at the time of interview, and reasons for not looking for work are asked only in those household that are in the fourth and eighth months of the sample, i.e., the "outgoing" groups, those which had been in the sample for 3 previous months and would not be in for the subsequent month.

These items are asked in question 24. See facsimile questionnaire in Appendix B. Such persons have an ESR code of 4-7 in character 12 of the person record.

Finally, it should be noted that the unemployment rate represents the number of persons unemployed as a percent of the civilian labor force 16 years old and over. This measure can also be computed for groups within the labor force classified by sex, age, marital status, race, etc. The job-loser, job-leaver, reentrant and new entrant rates are each calculated as a percent of the civilian labor force 16 years old and over: the sum of the rates for the four groups thus equals the total unemployment rate.

Layoff - Unemployed but waiting to be called back to a specific job because one expects to be called back to work. If one expects to be called back within 30 days, it is considered a temporary layoff; otherwise, it is an indefinite layoff.

Looking For Work - Trying to get work or trying to establish a business or profession.

Marital Status - The marital status classification identifies three major categories: never married, married, widowed, or divorced. These terms refer to the marital status at the time of enumeration.

The category "married" is further divided into "married, spouse present" and "spouse absent" (including separated). A person was classified as "married, spouse present" if the husband or wife was reported as a member of the household even though he or she

may have been temporarily absent on business or on vacation, visiting, in a hospital, etc., at the time of the enumeration. The group "other married, spouse absent" includes married persons employed and living for several months at a considerable distance from their homes, those whose spouses were absent in the Armed Forces, immigrants whose spouses remained in other areas, husbands or wives of inmates of institutions, and all other married persons (including those reported as separated) whose places of residence were not the same at that of their spouses.

Month-In-Sample - The number of times a unit has been interviewed. Each unit will be interviewed eight times during the life of the sample. (Also see discussion of sample design).

Never Worked - A person who has never held a full-time civilian job lasting 2 consecutive weeks or more.

Nonrelative of Head With No Own Relatives in Household - A non-relative of the head who has no relative(s) of his own in the household. This category includes such nonrelatives as a foster child, a ward, a lodger, a servant, or a hired hand, who has no relatives of his own living with him in the household.

Nonrelative of Head With Own Relatives (including wife) in Household - Any household member who is not related to the head but has relatives of his own in the household. For example, a lodger, his wife, and their son.

Other Relative of Head - Any relative of the household head other than his wife; for example, his child, father, mother, grandson, daughter-in-law, etc.

Part-time, Economic Reasons - "economic reasons" include: Slack work, material shortages, repairs to plant or equipment, start or termination of job during the week, and inability to find full-time work. (See also full-time labor force).

Part-time, Other Reasons - "Other reasons" include: labor dispute, bad weather, own illness, vacation, demands of home housework, school, no desire for full-time work, and full-time worker only during peak season.

Part-time Work - Persons who worked between 1 and 34 hours are designated as working "part-time" during reference week.

Race - The population is divided into three groups on the basis of race: White, Black, and "Other races". The last category includes Indians, Japanese, Chinese, and any other race except White and Black. In most of the published tables, "Other Races" are shown in combination with the Black population.

Reentrants - Persons who previously worked at a full-time job lasting 2 weeks or longer but who were out of the labor force prior to beginning to look for work.

School - A person who spent most of his time during survey week attending any kind of public or private school, including trade or vocational schools in which students receive no compensation in money or kind.

Spanish Origin - Persons of Spanish origin in this file were determined on the basis of a question that asked for self-identification of the person's origin or descent. Respondents were asked to select their origin (or the origin of some other household member) from a "flash card" listing ethnic origins. Persons of Spanish origin, in particular, were those who indicated that their origin was Mexican, Puerto Rican, Cuban, Central or South American, or some other Spanish origin.

Unable to Work - Because of long-term physical or mental illness, lasting 6 months or longer

Unemployed - See "Labor Force".

Unpaid Family Workers - Persons working without pay for 15 hours a week or more on a farm or in a business operated by a member of the household to whom they are related by blood or marriage.

#### Unrelated

Veteran Status - If a male served at any time during the four major wars of this century, the code for the most recent wartime service is entered. The following codes are used:

1. Vietnam era
2. Korean
3. WWII
4. WWI
5. Other Service
6. Nonveteran

Years of School Completed - Data on years of school completed were derived from the combination of answers to questions concerning the highest grade of school attended by the person and whether or not that grade was finished. Educational attainment applies only to progress in "regular" school. Such schools include graded public, private, and parochial elementary and high schools (both junior and senior high), colleges, universities, and professional schools, whether day schools or night schools. Thus, regular schooling is that which may advance a person toward an elementary school certificate or high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools was counted only if the credits obtained were regarded as transferable to a school in the regular school system.

Wage and Salary Workers - Receive wages, salary, commission, tips, or pay in kind from a private employer or from a governmental unit.

Wife of Head - The wife of the household head. There can be only one wife of the head, even if there are two or more married couples living in the same unit.

Workers - Those persons who during the survey week did any work at all as paid employees, in their own business, profession, or farm, or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family.

## PART II

### Current Population Survey Supplements Technical Documentation

Part II of this technical documentation contains the information concerning the supplemental data collected for a specific month and year of the Current Population Survey.

## USE OF THIS DATA BASE DICTIONARY

This computer generated report documents the data contents and record layout. This report is organized into 2 parts, one part containing a general textual description of the file, and one part containing a description of each data item in the file. The data item description contains several pieces of information for each data item as follows:

NAME:	An arbitrarily assigned 12 character label. It may be a mnemonic or a numeric value indicating the location of the variable on the survey questionnaire.
DESCRIPTIVE LABEL:	A 40 character label describing the data item.
LENGTH:	The size of the data item in characters.
BEGIN:	The location in the data record of the first character of the data item.
MAXIMUM VALUE:	The highest value this data item may contain.
MINIMUM VALUE:	The lowest value this data item may contain.
DATA CATEGORY:	This field indicates whether the data item is a numeric item which can be meaningfully processed algebraically or if the item is a code item from which it would not be meaningful to summarize or derive percentages.
IMPLIED DECIMAL PLACES:	This field indicates how many, if any, implied places the data item contains.

## GLOSSARY

### Part 2

#### Supplemental Items

Current Population Survey, October, 1978

Business Schools - See "Special Schools."

Enrolled in School - enrollment in any type of regular or special school, whether day or night, public or private. This includes enrollment in professional school, extension school (taken for credit), vocational school, trade school (including training taken under the Comprehensive Employment and Training Act (CETA)) or business school. It also includes instructions by a tutor or correspondence or evening adult education courses provided credit is given towards an elementary school certificate, a high school diploma or college degree. This guideline applies even if the respondent is not working toward a degree. School enrollment does not include the following non-credit courses: correspondence courses, on-the-job training courses, courses taken for social and recreational purposes, and regular credit courses taken on a non-credit basis (audits). Physicians serving internships and residences are not considered to be enrolled in school.

Full-time Student - Criterion for college students differ from that for students in "special schools."

- a. College: Classification was based on the number of credit semester hours including classroom, laboratory, and field work during the average school week. Students taking 12 or more credit semester hours (or equivalent) were considered to be "full-time;" those with fewer hours were "part-time."
- b. Special School: Based on student's understanding of being classed by the school as a "full-time" or a "part-time" student. If that determination could not be given by the student or, in the absence of the student, by the household respondent, the student was classed as "Other -- not classifiable."

Nursery School - a group or class that is organized to provide educational experiences for children during the year or years preceding kindergarten. Private homes in which essentially custodial care (babysitting) is provided for one or more children

are not considered nursery schools. A child is not considered enrolled if he usually attends less than 2 hours a day.

Part-time Student - See "Full-time Student."

Public School - Any school or college controlled and supported primarily by a local State or Federal Government agency.

Private School - any school, academy or college which is controlled and supported primarily by a church or religious organization, or by private persons or organizations.

Regular School - schools which are part of a recognized regular school system -- public or private. Regular school advances a person toward an elementary school certificate, high school diploma or a college, university, or professional school. Consider schools for the mentally retarded or "regular" schools if they meet this criterion. (Note: A school does not have to have class levels in order to be a regular school.)

School/College Housing - a house or apartment owned or operated by the school or college. This includes a dormitory, fraternity, or sorority house located on or off campus and any other type of school or college housing sponsored by the school.

Schools for the Handicapped - schools for individuals with physical or mental handicaps may be either "regular" if they provide academic work leading to a degree or certificate or "special" if they are only custodial or provide technical training.

Special Schools - schools which offer trade, business, or vocational courses, or other courses which are not taken for social or recreational purposes.

Trade Schools - See "Special Schools."

Vocational Schools - See "Special Schools."

February 1980

- The Current Population Survey, October 1978 File has now been released. Below is an abstract which contains information about the file.

## ABSTRACT

Current Population Survey, October 1978  
[machine-readable data file] / conducted by  
the Bureau of the Census for the Bureau of  
Labor Statistics. --Washington : Bureau of  
the Census [producer and distributor], 1979.

TYPE OF FILE: Microdata; unit of observation is individuals within housing units.

UNIVERSE DESCRIPTION: The universe is the civilian non-institutional population living in housing units. Persons 14 and over living in sampled housing units have an adult record. Children 3-13 have child records. A probability sample is used in selecting housing units.

SUBJECT-MATTER DESCRIPTION: The file provides data on labor force activity, employment status, occupation, and industry of persons 14 years and over. Characteristics such as age, sex, race, marital status, household relationship, educational background, and Spanish origin are shown for each person in the household enumerated. Education data are provided for adults and children. Information includes current school enrollment, type of school in which enrolled, and grade attending for all persons 3 and older. Additional information for college students includes number of credit hours, major field of study, distance to school and principal means of transportation to school.

GEOGRAPHIC COVERAGE: Individual States are identified and ranked by population size (1970). Forty-four SMSA's are identified and ranked by size in 1970. Within confidentiality guidelines, indicators are also provided for SMSA/nonSMSA and central city/noncentral city of an SMSA.

# FILE AVAILABILITY:
