BIBLIOGRAPHIC CITATION

Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

U.S. Dept. of Commerce, Bureau of the Census. CURRENT POPULATION SURVEY, OCTOBER 1980: SCHOOL ENROLLMENT [Computer file]. Washington, DC: U.S. Dept. of Commerce, Bureau of the Census [producer], 1980. Ann Arbor, MI: Inter-university Consortium for Political and Social Research [distributor], 1991.

REQUEST FOR INFORMATION ON USE OF ICPSR RESOURCES

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data were used.

DATA DISCLAIMER

The original collector of the data, ICPSR, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

United States Department of Commerce. Bureau of the Census
CURRENT POPULATION SURVEY, OCTOBER 1980: SCHOOL ENROLLMENT (ICPSR 9535)

SUMMARY: Data on labor force activity for the week prior to the survey are supplied in this collection. Information is available on the employment status, occupation, and industry of persons 14 years old and over. Demographic variables such as age, sex, race, marital status, veteran status, household relationship, educational background, and Spanish origin are included. In addition to providing these core data, the October CPS survey also contains a special supplement on school enrollment. This supplement includes the following items: current grade attending at public or private school, whether attending college full- or part-time at a two- or four-year institution, year last attended a regular school, and year graduated from high school. CLASS IV

UNIVERSE: All persons in the noninstitutional population of the United States.

SAMPLING: Monthly probability sample based on a stratified sampling scheme. The sample consists of approximately 71,000 households.

EXTENT OF COLLECTION: 1 data file

DATA FORMAT: Logical Record Length

File Structure: rectangular

Cases: 188,318

Variables: approx. 320

Record Length: 480

Records Per Case: 1

Abstract

Current Population Survey, October 1980 [machine-readable data file] / conducted by the Bureau of the Census for the Bureau of Labor Statistics. --Washington: Bureau of the Census [producer and distributor], 1982.

TYPE OF FILE:

Microdata; unit of observation is individuals within housing units.

UNIVERSE DESCRIPTION:

The universe consists of all persons in the civilian noninstitutional population of the United States living in households. The probability sample selected to represent the universe consists of approximately 77,000 households.

SUBJECT-MATTER DESCRIPTION:

Data are provided on labor force activity for the week prior to the survey. Comprehensive data are available on the employment status, occupation, and industry of persons 14 years old and over. Also shown are personal characteristics such as age, sex, race, marital status, veteran status, household relationship, educational background, and Spanish origin.

In addition, this file includes supplemental data on education for adults and children. Data are provided on current school enrollment and grade attending for all persons 3 years old and over. Persons attending college were asked whether attending full or part time and whether attending a 2- or 4-year college. Data for persons 14-34 years of age include enrollment status in October 1979 and if a high school graduate, year graduated from high school. Persons between the ages 14-24 years and not a high school graduate were asked year last attended regular school. Persons not attending or enrolled in school were asked if they were taking any business, vocational, technical, or correspondence courses other than on the job training.

GEOGRAPHIC COVERAGE:

All States and 44 SMSA's are identified and ranked by population size (1970). Central city/noncentral city indicators are provided for records in all identified SMSA's. For all other records, central city/noncentral city and nonSMSA indicators are provided except where suppression is required for confidentiality reasons.

TECHNICAL DESCRIPTION:

FILE STRUCTURE: Rectangular.

FILE SIZE: 138,316 logical records; 450 character logical record length.

FILE SORT SEQUENCE: State rank by SMSA rank by household identification number by line number.

REFERENCE MATERIALS:

ATTACHMENT 2

Current Population Survey Non-March Record Layouts

Attached are record layouts for the October 1980 Current Population Survey. Record layouts illustrating basic data collected each month comprise Attachment 3 for interviewed households, Attachment 4 for noninterviewed Type A households, and Attachment 5 for noninterviewed Type B or C households. (See items 14 and 15 on questionnaire for examples of each type.) Next follows the record layouts for children and supplemental data collected.

In the record layout, location of data is indicated by character position within a word. Each word signifies six character positions on the tape. To determine the location of specific data, calculate the number of positions allocated for all previous words; then, to that figure, add the character location (1-6) specified within the designated word. For example, data for major activity last week (Attachment 3, page 12) corresponds to word 9, character 1. Multiplying the number of previous words by the number of character positions per word equals 48 positions allocated for data. Thus, the first character of word 9 is located in position 49.

$$\begin{array}{r} 8 \text{ Number of previous words} \\ \times 6 \text{ Number of character positions per word} \\ \hline 48 \text{ Number of positions allocated for data} \\ + 1 \text{ Character position within designated word} \\ \hline 49 \text{ Location of data for word 9, character 1} \end{array}$$

To determine the location of data reflecting the reason a respondent works less than 35 hours a week (word 9, characters 5-6), repeat the above calculations except substitute a "5" (noting character position within word) in place of the "1". Calculations show that this item occupies character positions 53 and 54.

Record layouts are similar for both interviewed and noninterviewed households. Geographic data are provided for both types of records, but employment figures are furnished only for interviewed households. For noninterviewed households, these corresponding character positions are blank or padded. However, in character positions 37 and 38, interview records show data for item 20, whether the household member worked last week, and range of hours worked; noninterview Type A records show race of head and reason for noninterview; noninterview Types B and C records show reason for noninterview.
