

IPUMS CPS

SUMMER DATA WORKSHOP

Using the Panel Component of IPUMS CPS

May 18-20, 2020

IPUMS is accepting applications for the IPUMS CPS Summer Data Workshop at IPUMS Headquarters on the University of Minnesota campus in Minneapolis, MN. The Current Population Survey (CPS) is an ongoing labor force survey in the U.S. Data are available annually back to 1962 with monthly data available since 1976. The workshop will familiarize researchers with the under-utilized panel component of the CPS.

The 2020 IPUMS CPS Workshop is targeted toward graduate students, postdoctoral fellows and early-career researchers from social science disciplines. The workshop will include presentations from the research team that developed IPUMS CPS and other experienced CPS researchers, lab sessions that provide hands-on experience using the CPS as a panel dataset, and small-group sessions where participants will discuss their own CPS research ideas. Lab sessions will be conducted in Stata. Regardless of their choice of statistical package, participants should be familiar with basic data management operations.

Applications are due February 23, 2020. Applicants should be prepared to submit:

- A curriculum vitae
- A cover letter summarizing (1) your research interests and motivation for learning more about the CPS panel component; (2) how the workshop will help you attain your research goals
- A letter of support from an advisor or senior colleague

Up to \$1,000 in expenses for the workshop will be covered; eligible expenses include domestic air fares, local transportation costs, and hotel accommodations.
